THE WORLD WAR

CHAPTER I

The Pirates of the Under-seas

GERMANY relied upon the submarine to win the war. This in a nut-shell explains the main reason why the United States was drawn into the World War. Von Tirpitz, the German Admiral, obsessed with the theory that no effective answer could be made to the submarine, convinced the German High Command and the Kaiser that only through unrestricted submarine warfare could England be starved and the war brought to an end with victory for Germany. Since August, 1914, the theory held by von Tirpitz and his party of extremists had been combated by Prince Maximilian of Baden and by Chancellor von Bethmann-Hollweg and by others high in the coun-

cil of the Kaiser. These men pointed out that, leaving out such questions as piracy on the high seas, the drowning of women and children, the destruction of the property of neutrals, there still remained the question of expediency. America, they asserted, was certain to enter the war if unrestricted submarine warfare was decreed. These men were denounced as cowards and von Tirpitz finally triumphed.

The submarine employed by the Germans was of the type designed by Simon Lake, an American. The Germans bought two submarines built by Mr. Lake at Kronstadt for the Russians during the Russian-Japanese war. Various improvements upon the Diesel engine and special training for submarine crews enabled the German navy to strike terrible blows during the early part of the war.

Little by little, however, the Allies discovered the answer to the submarine menace. One of these was the convoy: fleets of merchant vessels surrounded by fast destroyers made life a misery for the submarine crews. In the early days vessels of all character fled from the ap-

proach of the submarine. The destroyers of the convoys, however, adopted a different method. They rushed at the periscopes in efforts to ram the submarine, and as they raced over the spot where the submarine had been at the rate of twenty-two knots or more an hour, they dropped huge containers, dubbed "ash cans," containing depth charges of trinitrotoluol.

Sea planes carrying bombs, small dirigible balloons known as "blimps," observation balloons moored on the decks of warships, steel nets, and especially devised anti-submarine mines, were also factors in the general work of submarine destruction.

In addition to all these, every ship, both cargo carrier and war vessel, had its well-trained gun crew, and hundreds of thousands of keen-eyed mariners daily and nightly swept the seas with binoculars watching for anything that resembled a periscope.

As a consequence of this combination of destructive agencies the British Admiralty was enabled to announce at the close of the war

that more than 150 German submarines had been destroyed.

The names of the commanding officers of the German submarines which had been disposed of were given out by the government in order to substantiate to the world the statement made by the Prime Minister in the House of Commons on August 7th, and denied in the German papers, that "at least 150 of these ocean pests had been destroyed." The statement included no officers commanding the Austrian submarines, of which a number had been destroyed, and did not exhaust the list of German submarines put out of action.

The fate of the officers was given, and of these the majority (116) were dead; twenty-seven were prisoners of war, six were interned for the duration of the war in neutral countries where they took refuge, and one succeeded in returning to Germany.

Further light on the subject of German submarines was given on September 18, 1918, by Senator William H. Thompson of Kansas in a speech in which he told the Senate:

The submarine is no longer a serious menace to transportation across the seas. It is, of course, an annoyance and a great hindrance, and as long as there is a single submarine in the waters of the sea every effort must be made by the allied powers to destroy it, for it is an outlaw and must not exist. The truth is that Germany never had more than 320 submarines all told, including all construction before and since the war.

We have positive knowledge of the destruction of more than one-half of these submarines, and we also know, that it is practically impossible for Germany to keep in operation more than 10 per cent of those remaining. It is therefore reduced to a negligible quantity so far as its ultimate effect upon the result of the war is concerned.

I saw a reliable statement in France to the effect that there is one ship of some character leaving the eastern shores of America for the war zone every six minutes, and it is only a few vessels which are ever torpedoed, estimated at about 1 per cent. This is less than the loss by storm and accident in the earlier days of transportation and is not much greater than such loss now. We must bear in mind that we read only of the ships which have been torpedoed and see but little account of the hundreds of ships which pass over the ocean safely and undisturbed. Three hundred thousand soldiers are conveyed across the Atlantic every thirty days, and an average of about 500,000 tons of freight carried to the French coast. There are warehouses in only one of the many ports of France with a capacity of over 2,000,000 tons.

It is to the navy that the credit for the destruction of this outlaw seagoing craft is due. The navy is and has

been the backbone of this war, the same as it has been of almost every great war in history. Without the allied navy the submarine would have perhaps accomplished its nefarious purpose in starving the European allies and in preventing them from securing the necessary munitions of war to defend themselves. It has utterly failed in this respect. The Allies are amply supplied with food, and there are provisions enough on hand now, if every ship should be sunk, to last the Allies and armies for months. The destroyer is the ship which has brought Germany to her knees in submarine warfare and will keep her there. We have not enough destroyers, and it is for this reason we are obliged in this great transportation problem to run risks which would not be taken under ordinary conditions. If every ship was escorted by a sufficient number of destroyers I doubt if there would be a single ship of any consequence sunk, except by the merest accident.

Upon the same subject, Sir Eric Geddes, First Lord of the British Admiralty, on October 14th, reviewing the British effort in the war said that during 1918 the casualties of the British on the western front equaled those of all the Allies combined. The British Navy, he said, since the beginning of the war had lost in fighting ships of all classes a total of 230, more than twice the losses in war vessels of all the Allies.

In addition to these, Great Britain had lost 450 auxiliary craft, such as mine-sweepers and trawlers, making a total of 680. He revealed the fact that the effective warship barrage, which had been drawn between the Orkneys and Norway against German submarines and surface craft, was, during the later months of the war, maintained largely by ships of the United States.

The British merchant ships lost since 1914 exceeded 2,400, representing a gross tonnage of 7,750,000, nearly three times the aggregate loss of all other allied and neutral countries.

In his statement on the submarine situation he said:

> In February, 1917, the ruthless submarine warfare confronted us, whilst the armies in France at that time were feeling a sense of superiority over the enemy which was illustrated by the successes of the battle of Arras, the taking of Vimy Ridge, the advance between the Ancre and the Somme, the offensive in Champagne, Chemin des Dames, Messines and Passchendaele Ridges. Thus we felt, and rightly felt, that the weakest front at that time was the sea—not on the surface, but underwater.

The whole of the available energies of the Allies were consequently thrown into overcoming the submarine and the menace which threatened to destroy the lines of communication of the Alliance. The reduced sinkings which have been published since that period show how we gradually overcame that menace—and today most men say that the submarine menace is a thing of the past.

That it is a thing of the past in so far as it can never win the war for the enemy or enable the enemy to prevent us from winning the war, provided we do not underrate the danger but take adequate steps against it, I affirm now as the opinion of the British Admiralty; but it is a menace that comes and goes.

The end of the great submarine menace came on November 20th, when twenty German submarines were officially surrendered to Rear-Admiral Tyrwhitt of the British Navy, thirty miles off Harwich, England. Within the following week more than eighty other German submarines and a number of Austrian craft were also surrendered to the British. The spectacle of the surrender was most impressive.

After steaming some twenty miles across the North Sea, the Harwich forces, which consisted of five light cruisers and twenty destroyers, were sighted. The flagship of Admiral Tyrwhitt, the commander, was the Curaçao.

High above about the squadron hung a big observation balloon.

The squadron, headed by the flagship, then steamed toward the Dutch coast, followed by the Coventry, Dragoon, Danal and Centaur. Other ships followed in line with their navigation lights showing. The picture was a noble one as the great vessels, with the moon still shining, ploughed their way to take part in the surrender of the German U-boats.

Soon after the British squadron started the "paravanes" were dropped overboard. These devices are shaped like tops and divert any mines which may be encountered, for the vessels were now entering a mine field.

Almost everyone on board donned a life belt and just as the red sun appeared above the horizon the first German submarine appeared in sight.

Soon after seven o'clock twenty submarines were seen in line, accompanied by two German destroyers, the Tibania and the Sierra Ventana, which were to take the submarine crews back to Germany after the transfer.

All the submarines were on the surface with their hatches open and their crews standing on deck. The vessels were flying no flags whatever and their guns were trained fore and aft, in accordance with the terms of surrender.

A bugle sounded on the Curaçao and all the gun crews took up their stations, ready for any possible treachery.

The leading destroyer, in response to a signal from the admiral, turned and led the way towards England and the submarines were ordered to follow. They immediately did so. The surrender had been accomplished.

Each cruiser turned, and, keeping a careful lookout, steamed toward Harwich. On the deck of one of the largest of the submarines, which carried two 5.9 guns, twenty-three officers and men were counted. The craft was estimated to be nearly 300 feet in length. Its number had been painted out.

Near the Ship Wash lightship three large British seaplanes, followed by an airship, were observed.

One of the submarines was seen to send up a

couple of carrier pigeons and at once a signal was flashed from the admiral that it had no right to do this.

When the ships had cleared the mine field and entered the war channel the "paravanes" were hauled aboard. On reaching a point some twenty miles off Harwich the ships dropped anchor and Captain Addison went out on the warship Maidstone.

British crews were then put on board the submarines to take them into harbor. With the exception of the engine staffs all the German sailors remained on deck. The submarines were then taken through the gates of the harbor and the German crews were transferred to the transports and taken back to Germany.

As the boats went through the gates a white signal was run up on each of them with the German flag underneath.

Each German submarine commander at the transfer was required to sign a declaration to the effect that his vessel was in running order, that its periscope was intact, that its torpedoes

were unloaded and that its torpedo heads were safe.

Orders had been issued forbidding any demonstration and these instructions were obeyed to the letter. There was complete silence as the submarines surrendered and as the crews were transfrred.

On November 21st, the German High Seas Fleet that had been protected by the submarines surrendered to the combined fleet consisting of British, American and French battleships. The British admiralty's terse statement concerning the historic spectacle follows:

> The commander-in-chief of the Grand Fleet has reported that at 9.30 o'clock this morning he met the first and main installment of the German high seas fleet, which is surrendering for internment. Admiral Sir David Beatty is Commander-in-chief of the Grand Fleet.

On the same day another flotilla of German U-boats also was surrendered to a British squadron. There were nineteen submarines in all; the twentieth broke down on the way.

The Grand Fleet, accompanied by five American battleships and three French cruis-

ers, steamed out at 3 o'clock on the morning of November 21st, from its Scottish base to accept the surrender. The vessels moved in two long columns.

The German fleet which surrendered consisted of nine battleships, five cruisers, seven light cruisers and fifty destroyers. Seventy-one vessels in all. There remained to be surrendered two battleships, which were under repair, and fifty modern torpedo-boat destroyers.

One German destroyer while on its way across the North Sea with the other ships of the German high seas fleet to surrender struck a mine. It was so badly damaged that it sank.

Describing the surrender of the German warships to Sir David Beatty, the Commander-in-Chief of the grand fleet, correspondents said that after all the German ships had been taken over, the British admiral went through the line on the Queen Elizabeth, every Allied vessel being manned and greeting the admiral and the flagship with loud and ringing cheers.

The British grand fleet put to sea in two single lines six miles apart, and so formed as to

enable the surrendering fleet to come up the center. The leading ship of the German line was sighted between 9 and 10 o'clock in the morning. It was the Seydlitz, flying the German naval ensign.

A telegram received in Amsterdam from Berlin gave this list of surrendered warships, which includes one more battleship than later reports showed:

Battleships—Kaiser, 24,113 tons; Kaiserin, 24,113 tons; Koenig Albert, 24,113 tons; Kronprinz Wilhelm, 25,000 tons; Prinzregent Luitpold, 24,113 tons; Markgraf, 25,293 tons; Grosser Kurfuerst, 25,293 tons; Bayern, 28,000 tons; Koenig, 25,293 tons, and Friedrich der Grosse, 24,113.

Battle Cruisers—Hindenburg, 27,000 tons; Derflinger, 28,000 tons; Seydlitz, 25,000 tons; Moltke, 23,000 tons, and Von Der Tann, 18,800 tons.

Light Cruisers—Bremen, 4000 tons; Brummer, 4000 tons; Frankfurt, 5400 tons; Koeln, tonnage uncertain; Dresden, tonnage uncertain, and Emden, 5400 tons.

CHAPTER II

Approaching the Final Stage

THE might and pride of Germany were smashed and humbled by Foch in frontal attacks divided roughly into three great sectors. The first of these attacks was delivered by the French and Americans in the southern sector which included Verdun and the Argonne. The second smash was delivered by British, French and Americans in the Cambrai sector. The third was delivered by British, Belgians, French and Americans in the Belgian sector on the north of the great battle line.

The Cambrai operation had as its first objectives the possession of the strategic railways both of which ran from Valenciennes, one to the huge distribution center at Douai; the other to Cambrai itself. To reach these objectives the Allies were obliged to cross the Sensée and the

Escaut canals under infantry and artillery fire. Besides these natural obstacles, there was the famous Hunding line of fortifications erected by the Germans between the Scarpe and the Oise River.

The attack was opened in force on September 18, 1918, by the Fourth British army under General Rawlinson and the First French army under General Debeney. The assault was successful northwest of St. Quentin and determined German counter-attacks were broken down by French and British artillery fire.

The Third British army under General Byng and the Thirtieth American division cooperating with the First British army under Sir Henry Horne, attacked furiously over a fourteen mile front toward Cambrai. The net result of this operation was the possession of the Canal du Nord, the taking of several villages, and 6,000 prisoners. This was on September 27th. The following day the same forces captured Fontaine-Notre Dame, Marcoing, Noyelles, and Cantaing. More than 200 guns were captured and 10,000 prisoners. On

September 29th the Americans took Bellecourt and Nauroy, and invested the suburbs of Cambrai. The British crossed the Escaut canal and the Canadians penetrated some of the environs of Cambrai.

The resolution and ferocity of the attack thoroughly dismayed the Germans, and the salient produced by the smash forced the Teutons to evacuate the greatly prized Lens coal fields on October 3rd. Horne and Byng continued their advance, the former occupying Biache-St. Vaast southwest of Douai, and the latter reaching a position five miles northwest of Cambrai.

Caught between the jaws of the pincers, the German forces occupying Cambrai made haste to escape outright capture. The city that had been the objective of British hopes and thrusts for two years, fell into the hands of the Allies. The German retreat extended over a thirty-mile front and included both St. Quentin and Cambrai. Simultaneously the German forces between Arras and St. Quentin fell steadily backward. Le Cateau and Zazeuel fell into

the hands of the British October 17th, three thousand prisoners and a quantity of war material being included in the bag.

In the meantime General Mangin attacking in the Laon sector, drove the Germans from the strategic Chemin des Dames and with General Berthelot captured Berry-au-Bac, the St. Gobain massif and completed contact with Generals Pershing and Gouraud on the right and with Generals Rawlinson and Debeney on the left.

The Allied advance now became a huge steel broom, sweeping the Germans irresistibly before it. The operation extended from the Oise southeast to the Aisne, broadening thence until it included the entire front. The Hindenburg line, the Somme battle-field, the Hunding line, were all quickly overrun. The fortress of Maubeuge, fifty miles northeast of St. Quentin, which was connected with that city by a triple railway connection, was evacuated as a direct result of this operation.

When St. Quentin itself fell into the hands of Debeney, it was found that the Germans had

deported the entire civilian population of 50,000.

This was the crux of the operations by Foch. Germans were given no rest; night and day the pressure continued. Every clash showed the increasing superiority of the Allies both in men and material and the corresponding deterioration of the German forces. This demoralization of the Germans extended from the High Command to the private soldier. Prisoners poured into the hands of the Allies. Evacuation of Lille was commenced on October 2d and Roubaix and Turcoing also fell.

It was the beginning of Germany's military debacle. The time was ripe for the coup-de-grâce soon to be delivered by Americans cooperating with the Allies on a seventy-one mile front.

The Kaiser, Ludendorff and von Hindenburg abandoned hope. The command went forth from the German general headquarters to retreat, retreat, retreat, while Prince Maximilian of Baden, appealed to America for an armistice. The sword in Germany's hand was

broken. Autocracy, defeated in the eyes of its deluded subjects and discredited in the eyes of the world, was in headlong flight. Its only concern was to save as much as possible from the ruins of the ostentatious temple it had reared.

CHAPTER III

Last Days of the War

FROM November 1st until November 11th, the day when the armistice granting terms to Germany was signed, the collapse of the German defensive was complete. The army that under von Hindenburg and Ludendorff had smashed its way over Poland, Roumania, Serbia, Belgium, and into the heart of France, was now a military machine in full retreat. It is only justice to that machine to say that the great retreat at no place degenerated into a rout. Von Hindenburg and the German General Staff had planned a series of rear-guard actions that were effective in protecting the main bodies of infantry and artillery. Machine-gun nests and airplane attacks were the main reliance of the Germans in these maneuvers of delay, but the German field artillery also did its share.

Immense quantities of material and many thousands of prisoners were captured by the British, Canadians and Australians in the north, and by the French and Americans in the south. Simultaneously with this wide and savage drive upon the Germans along the Belgian and French fronts, came the heaviest Italian attack of the war. Before it the Austrians were swept in a torrent that was irresistible. French, English and American troops cooperated in this thrust that extended from the plains of the Piave into Trentino. The immediate effect of the Italian offensive was to force Austria to her knees in abject surrender. An armistice, humiliating in its terms, was signed by the Austrian representatives, and the back door to Germany was opened to the Allies.

Germany's frantic plea for an armistice followed. There were those in the Allied countries who maintained that nothing short of unconditional surrender should be permitted. Cooler counsel prevailed, and an armistice was offered to the German High Command

CARRYING THE WAR INTO GERMANY

Mechanics "tuning up" one of the giant British bombing machines developed in 1918 for raiding Germany. The size is shown by comparison with the human figures. Note the forward gunner, the pilot, the rear gunner and the window of the commodious cock-pit within which the airmen could stand upright.

through General Foch, the terms of which far exceeded in severity those granted to Turkey and Austria. These were read for the first time by Germany's representatives on Friday, November 8th. General Foch, when he gave the document to the German delegation, declared that Germany's decision must be made within seventy-two hours. Eleven o'clock on Monday, November 11th, was the time limit permitted to Germany. The armistice was signed by General Foch and the German representatives on the morning of November 11th, but fighting did not actually cease until eleven o'clock, several hours after the terms had been agreed to. This was in accordance with arrangement made between the signers.

Sedan, where Marshals McMahon and Bazaine, commanding the armies of Napoleon III, surrendered to the King of Prussia in 1870, marked the last notable victory of the American forces in France. The Sedan of 1870 marked the birth of German militarism. The Sedan of 1918 marked its death.

Preceding the advance of the Americans

upon Sedan, came a cloud of aviators in pursuit and bombing planes, headed by the famous aces of the American forces. The First and Second divisions of the First army led the way. In the van of the Second division were the Marines, whose heroism in Belleau Wood marked the beginning of Germany's end. The famous Rainbow division made the most savage thrust of the action, pursuing the foe for ten miles and sweeping the Freya Hills clear of machine nests and German artillery.

The last action of the war for the Americans followed immediately on the heels of the battle of Sedan. It was the taking of the town of Stenay. The engagement was deliberately planned by the Americans as a sort of battle celebration of the end of the war. The order fixing eleven o'clock as the time for the conclusion of hostilities, had been sent from end to end of the American lines. Its text follows:

1. You are informed that hostilities will cease along the whole front at 11 o'clock A M., November 11, 1918, Paris time.

2. No Allied troops will pass the line reached by them at that hour in date until further orders.

3. Division commanders will immediately sketch the location of their line. This sketch will be returned to headquarters by the courier bearing these orders.

4. All communication with the enemy, both before and after the termination of hostilities, is absolutely forbidden. In case of violation of this order severest disciplinary measures will be immediately taken. Any officer offending will be sent to headquarters under guard.

5. Every emphasis will be laid on the fact that the arrangement is an armistice only and not a peace.

6. There must not be the slightest relaxation of vigilance. Troops must be prepared at any moment for further operations.

7. Special steps will be taken by all commanders to insure strictest discipline and that all troops be held in readiness fully prepared for any eventuality.

8. Division and brigade commanders will personally communicate these orders to all organizations.

Signal corps wires, telephones and runners were used in carrying the orders and so well did the big machine work that even patrol commanders had received the orders well in advance of the hour. Apparently the Germans also had been equally diligent in getting the orders to the front line. Notwithstanding the hard fighting they did Sunday to hold back the Americans, the Germans were able to bring the firing to an abrupt end at the scheduled hour.

The staff and field officers of the American army were disposed early in the day to approach the hour of eleven with lessened activity. The day began with less firing and doubtless the fighting would have ended according to plan, had there not been a sharp resumption on the part of German batteries. The Americans looked upon this as wantonly useless. It was then that orders were sent to the battery commanders for increased fire.

Although there was no reason for it, German ruthlessness was still rampant Sunday, stirring the American artillery in the region of Dun-sur-Meuse and Mouzay to greater activity. Six hundred aged men and women and children were in Mouzay when the Germans attacked it with gas. There was only a small detachment of American troops there and the town no longer was of strategical value. However, it was made the direct target of shells filled with phosgene. The enemy hurled them into the town until every street reeked with gas.

Poorly clad and showing plainly evidences

AMERICANS ATTACKING A GERMAN TRENCH POSITION

Company M and Company K of the 307th Infantry, 82d Division, advance on German position behind the edge of a wood. The 307th Engineers, 82d Division, clear the way by blowing up wire entanglements. The attacking men pause on the right near the point where the breach in the wire obstacles has been made.

of malnutrition, the inhabitants crowded about the Americans, kissing their hands and hailing them as deliverers. They declared they had had no meat for six weeks. They virtually had been prisoners of war for four years and were overwhelmed with joy when they learned that an armistice was probable.

The last French town to fall into American hands before the armistice went into effect was Stenay. Patrols reported they had found it empty not more than a quarter of an hour before eleven o'clock. American troops rushed through the town and in a few minutes Allied flags were beginning to appear from the windows. As the church bell solemnly tolled the hour of eleven, troops from the Ninetieth division were pouring into the town.

The inhabitants told the usual stories of German treatment. They were forced to work at all sorts of tasks from seven in the morning until six at night. In return they received paper bills with which they were unable to purchase milk and similar necessities. The ma-

jority, however, were so overjoyed at their deliverance that they were almost incoherent in discussing the enemy occupation.

The inhabitants of Stenay remained hiding in their cellars even after the Americans had entered the town. They came out hesitatingly and in small groups.

Hostilities along the American front ended with a crash of cannon.

The early forenoon had been marked by a falling off in fire all along the line, but an increasing bombardment from the retreating Germans at certain points stimulated the Americans to a quick retort. From their positions north of Stenay to southeast of the town the Americans began to bombard fixed targets. The firing reached a volume at times almost equivalent to a barrage.

Two minutes before eleven o'clock the firing dwindled, the last shells shrieking over No Man's Land precisely on time.

There was little celebration on the front line, where American routine was scarcely disturbed over the cessation of fighting. In the areas be-

hind the battle zone there were celebrations on all sides. Here and there there were little outbursts of cheering, but even those instances were not on the immediate front.

Many of the French soldiers went about singing.

"Well, I don't know," drawled a lieutenant from Texas while the artillery was sending its last challenge to the Germans, "but somehow I can't help wondering if we have licked them enough."

The Germans were manifestly so glad over the cessation of hostilities that they could not conceal their pleasure. Prisoners taken at Stenay grinned with satisfaction. Their demeanor was in sharp contrast to that of the American doughboys who took the matter philosophically and went about their appointed tasks.

In the front line it was the same. The Americans were happy, but quiet. They made no demonstrations. The Germans on the other hand were in a regular hysteria of joy. They waited only until nightfall to set off every

rocket in their possession. In the evening the sky was ablaze with red, green, blue and yellow flares all along the line.

Flags appeared like magic over the shell-torn buildings of Verdun, French and American colors flying side by side.

In every village, even those from which the Germans had been driven there were flags and decorations which were brought up to the front by the soldiers. In the villages back of the line there were impromptu celebrations and the civilians in holiday spirit saluted the Americans, shouting "The war is finished."

Northeast of Verdun, just before 11 o'clock, American artillerymen in loading a six-inch howitzer, wrote "good luck" on a ninety-pound shell and "let 'er go." The shot was aimed at the cross-road at Ornas, just ahead of the American lines.

While the bells of the ancient Verdun Cathedral were ringing the news of peace the fortress city was illuminated and a military procession headed by the drum corps of the Twenty-sixth American division swung along the crowded

streets accompanied by a French detachment of buglers representing the famed defenders of Verdun.

Only a half hour before the Germans had thrown large shells within the city walls, apparently as a reminder that Verdun was still within the range of their guns on the hills to the northeast.

Monday afternoon and night virtually was the first time that Verdun had not been shelled in many hours almost since the war began.

CHAPTER IV

The Drastic Terms of Surrender

THE end of the war came with almost the dramatic suddenness of its beginning. Bulgaria, hemmed in by armies through which no relief could penetrate, asked for terms. The reply came in two words, "Unconditional Surrender." Turkey, witnessing the rout of her army in Palestine by the great strategist, General Allenby, and a British army, asked for an armistice. The Porte signed without hesitation an agreement comprising twenty-five severe requirements.

The surrender of Bulgaria and Turkey forced Austria's hand. The terms under which it was permitted to capitulate were even harder than those granted to Turkey. They comprised eighteen requirements divided into military and naval clauses.

Germany, proud, imperial Germany, met the

greatest humiliation of all the Teutonic allies when the Kaiser and the German High Command were brought to their knees. Thirty-five clauses, the most severe and drastic ever demanded from a great power, were included in the armistice agreement. Only the imminent menace of an invasion of Germany would have sufficed to compel the German representatives to sign such a document. Following are the drafts of the Turkish, Austrian and German armistice agreements.

THE TURKISH AGREEMENT

1. The opening of the Dardanelles and the Bosporus and access to the Black Sea. Allied occupation of the Dardanelles and Bosporus forts.

2. The positions of all mine fields, torpedo tubes and other obstructions in Turkish waters are to be indicated, and assistance given to sweep or remove them, as may be required.

3. All available information concerning mines in the Black Sea is to be communicated.

4. All Allied prisoners of war and Armenian interned persons and prisoners are to be collected in Constantinople and handed over unconditionally to the Allies.

5. Immediate demobilization of the Turkish army, except such troops as are required for surveillance on the frontiers and for the maintenance of internal order.

The number of effectives and their disposition to be determined later by the Allies after consultation with the Turkish Government.

6. The surrender of all war vessels in Turkish waters or waters occupied by Turkey. These ships will be interned in such Turkish port or ports as may be directed, except such small vessels as are required for police and similar purposes in Turkish territorial waters.

7. The Allies to have the right to occupy any strategic points in the event of any situation arising which threatens the security of the Allies.

8. Use by Allied ships of all ports and anchorages now in Turkish occupation and denial of their use by the enemy. Similar conditions are to apply to Turkish mercantile shipping in Turkish waters for the purposes of trade and the demobilization of the army.

9. Allied occupation of the Taurus Tunnel system in Asia Minor.

10. Immediate withdrawal of Turkish troops from Northern Persia to behind the pre-war frontier already has been ordered and will be carried out.

11. A part of Transcaucasia already has been ordered to be evacuated by Turkish troops. The remainder to be evacuated, if required by the Allies, after they have studied the situation.

12. Wireless, telegraph and cable stations to be controlled by the Allies. Turkish Government messages to be excepted.

13. Prohibition against the destruction of any naval, military or commercial material.

14. Facilities are to be given for the purchase of coal, oil, fuel and naval material from Turkish sources, after

FAMOUS FRENCH GENERALS

Marshall Petain, Commander-in-Chief of the French armies in the West; Generals Mangin, Gouraud and Humbert, Army Commanders in the West; General Gallieni, Commander of Paris, who sent forward an army in taxicabs to save the day at the First Battle of the Marne.

the requirements of the country have been met. None of the above materials are to be exported.

15. The surrender of all Turkish offices in Tripolitania and Cyrenaica to the nearest Italian garrison. Turkey agrees to stop supplies and communication with these officers if they do not obey the order to surrender.

16. The surrender of all garrisons in Hedjaz, Assir, Yemen, Syria and Mesopotamia to the nearest Allied commander, and withdrawal of Turkish troops from Cilicia, except those necessary to maintain order, as will be determined under Clause 6.

17. The use of all ships and repair facilities at all Turkish ports and arsenals.

18. The surrender of all ports occupied in Tripolitania and Cyrenaica, including Mizurata, to the nearest Allied garrison.

19. All Germans and Austrians, naval, military or civilian, to be evacuated within one month from Turkish dominions, and those in remote districts as soon after that time as may be possible.

20. Compliance with such orders as may be conveyed for the disposal of equipment, arms and ammunition, including the transport of that portion of the Turkish army which is demobilized under Clause 5.

21. An Allied representative to be attached to the Turkish Ministry of Supplies in order to safeguard Allied interests. This representative to be furnished with all aid necessary for this purpose.

22. Turkish prisoners are to be kept at the disposal of the Allied Powers. The release of Turkish civilian prisoners and prisoners over military age is to be considered.

23. An obligation on the part of Turkey to cease all relations with the Central Powers.

24. In case of disorder in the six Armenian vilayets the Allies reserve to themselves the right to occupy any part of them.

25. Hostilities between the Allies and Turkey shall cease from noon, local time, Thursday, the 31st of October, 1918.

THE AUSTRIAN AGREEMENT

Military Clauses

1. The immediate cessation of hostilities by land, sea and air.

2. Total demobilization of the Austro-Hungarian army and immediate withdrawal of all Austro-Hungarian forces operating on the front from the North Sea to Switzerland. Within Austro-Hungarian territory, limited as in Clause 3 below, there shall only be maintained as an organized military force reduced to pre-war effectiveness. Half the divisional, corps and army artillery and equipment shall be collected at points to be indicated by the Allies and United States of America for delivery to them, beginning with all such material as exists in the territories to be evacuated by the Austro-Hungarian forces.

3. Evacuation of all territories invaded by Austro-Hungary since the beginning of the war. Withdrawal within such periods as shall be determined by the commander-in-chief of the Allied forces on each front of the Austro-Hungarian armies behind a line fixed as follows:—

From Pic Umbrail to the north of the Stelvo it will

follow the crest of the Rhetian Alps up to the sources of the Adige and the Eisach, passing thence by Mounts Reschen and Brenner and the heights of Oetz and Zoaller. The line thence turns south, crossing Mount Toblach and meeting the present frontier Carnic Alps. It follows this frontier up to Mount Tarvis and after Mount Tarvis the watershed of the Julian Alps by the Col of Predil, Mount Mangart, the Terglou and the watershed of the Cols di Podberdo, Podlaniscam and Idria. From this point the line turns southeast towards the Schneeberg, excludes the whole basin of the Save and its tributaries. From Schneeberg it goes down towards the coast in such a way as to include Castua, Mattuglia and Bolosca in the evacuated territories.

It will also follow the administrative limits of the present province of Dalmatia, including the north Lisarica and Trivania and, to the south, territory limited by a line from the Semigrand of Cape Planca to the summits of the watersheds eastwards, so as to include in the evacuated area all the valleys and water course flowing towards Sebenaco, such as the Cicola, Kerga, Butisnica and their tributaries. It will also include all the islands in the north and west of Dalmatia from Premuda, Selve, Ulbo, Scherda, Maon, Paga and Puntadura in the north up to Meleda in the south, embracing Santandrea, Busi, Lisa, Lesina, Tercola, Curzola, Cazza and Lagosta, as well as the neighboring rocks and islets and pressages, only excepting the islands of Great and Small Zirona, Bua, Solta and Brazza. All territory thus evacuated shall be occupied by the forces of the Allies and of the United States of America.

All military and railway equipment of all kinds, in-

cluding coal belonging or within those territories, to be left in situ and surrendered to the Allies, according to special orders given by the commander-in-chief of the forces of the associated Powers on the different fronts. No new destruction, pillage or requisition to be done by enemy troops in the territories to be evacuated by them and occupied by the forces of the associated Powers.

4. The Allies shall have the right of free movement over all road and rail and waterways in Austro-Hungarian territory and of the use of the necessary Austrian and Hungarian means of transportation. The armies of the associated Powers shall occupy such strategic points in Austria-Hungary at times as they may deem necessary to enable them to conduct military operations or to maintain order. They shall have the right of requisition on payment for the troops of the associated Powers whatever they may be.

5. Complete evacuation of all German troops within fifteen days not only from the Italian and Balkan fronts, but from all Austro-Hungarian territory. Internment of all German troops which have not left Austro-Hungary within the date.

6. The administration of the evacuated territories of Austria-Hungary will be entrusted to the local authorities under the control of the Allied and associated armies of occupation.

7. The immediate repatriation without reciprocity of all Allied prisoners of war and internal subjects and of civil populations evacuated from their homes on conditions to be laid down by the commander-in-chief of the forces of the associated Powers on the various fronts

Sick and wounded who cannot be removed from evacuated territory will be cared for by Austria-Hungary personnel, who will be left on the spot with the medical material required.

Naval Clauses

1. Immediate cessation of all hostilities at sea and definite information to be given as to the location and movements of all Austro-Hungarian ships. Notification to be made to neutrals that freedom of navigation in all territorial waters is given to the naval and mercantile marine of the Allied and associated Powers, all questions of neutrality being waived.

2. Surrender to Allies and the United States of fifteen Austro-Hungarian submarines completed between the years 1910 and 1918 and of all German submarines which are in or may hereafter enter Austro-Hungarian territorial waters. All other Austro-Hungarian submarines to be paid off and completely disarmed and to remain under the supervision of the Allies and United States.

3. Surrender to Allies and United States with their complete armament and equipment of three battleships, three light cruisers, nine destroyers, twelve torpedo boats, one mine layer, six Danube monitors, to be designated by the Allies and United States of America. All other surface warships, including river craft, are to be concentrated in Austro-Hungarian naval bases to be designated by the Allies and United States of America and are to be paid off and completely disarmed and placed under the supervision of Allies and United States of America.

4. Freedom of navigation to all warships and merchant ships of Allied and associated Powers to be given in the Adriatic and up the River Danube and its tributaries in the territorial waters and territory of Austria-Hungary. The Allies and associated Powers shall have the right to sweep up all mine fields and obstructions, and the positions of these are to be indicated. In order to insure the freedom of navigation on the Danube, the Allies and the United States of America shall be empowered to occupy or to dismantle all fortifications or defense work.

5. The existing blockade conditions set up by the Allied and associated Powers are to remain unchanged and all Austro-Hungarian merchant ships found at sea are to remain liable to capture, save exceptions may be made by a commission nominated by the Allies and the United States of America.

6. All naval aircraft are to be concentrated and impactionized in Austro-Hungarian bases to be designated by the Allies and United States of America.

7. Evacuation of all the Italian coasts and of all ports occupied by Austria-Hungary outside their national territory and the abandonment of all floating craft, naval materials, equipment and materials for inland navigation of all kinds.

8. Occupation by the Allies and the United States of America of the land and sea fortifications and the islands which form the defenses and the dockyards and arsenal at Pola.

9. All merchant vessels held by Austria-Hungary belonging to the Allies and associated Powers to be returned.

10. No destruction of ships or of materials to be permitted before evacuation, surrender or restoration.

11. All naval and mercantile marine prisoners of the Allied and associated Powers in Austro-Hungarian hands to be returned without reciprocity.

THE GERMAN AGREEMENT

1. Cessation of operations by land and in the air six hours after the signature of the armistice.

2. Immediate evacuation of invaded countries: Belgium, France, Alsace-Lorraine, Luxemburg, so ordered as to be completed within fourteen days from the signature of the armistice. German troops which have not left the above mentioned territories within the period fixed will become prisoners of war. Occupation by the Allied and United States forces jointly will keep pace with evacuation in these areas. All movements of evacuation and occupation will be regulated in accordance with a note annexed to the stated terms.

3. Repatriation beginning at once and to be completed within fifteen days of all inhabitants of the countries above mentioned, including hostages and persons under trial or convicted.

4. Surrender in good condition by the German armies of the following equipment: Five thousand guns (two thousand five hundred heavy, two thousand five hundred field), twenty-five thousand machine guns, three thousand minenwerfers, seventeen hundred airplanes. The above to be delivered in situ to the Allies and the United States troops in accordance with the detailed conditions laid down in the annexed note.

5. Evacuation by the German armies of the countries

on the left bank of the Rhine. These countries on the left bank of the Rhine shall be administered by the local troops of occupation under the control of the Allied and United States armies of occupation. The occupation of these territories will be carried out by Allied and United States garrisons holding the principal crossings of the Rhine, Mayence, Coblenz, Cologne, together with bridgeheads at these points in thirty kilometer radius on the right bank and by garrisons similarly holding the strategic points of the regions.

A neutral zone shall be reserved on the right of the Rhine between the stream and a line drawn parallel to it forty kilometers (twenty-six miles) to the east from the frontier of Holland to the parallel of Gernsheim and as far as practicable a distance of thirty kilometers (twenty miles) from the east of the stream from this parallel upon Swiss frontier. Evacuation by the enemy of the Rhine lands shall be so ordered as to be completed within a further period of sixteen days, in all thirty-one days after the signature of the armistice. All movements of evacuation and occupation will be regulated according to the note annexed.

6. In all territory evacuated by the enemy there shall be no evacuation of inhabitants; no damage or harm shall be done to the persons or property of the inhabitants. No destruction of any kind to be committed. Military establishments of all kinds shall be delivered as well as military stores of food, munitions, equipment not removed during the periods fixed for evacuation. Stores of food of all kinds for the civil population, cattle, etc., shall be left in situ. Industrial establishments shall not be impaired in any way and their personnel shall not be

moved. Roads and means of communication of every kind, railroad, waterways, main roads, bridges, telegraphs, telephones, shall be in no manner impaired. No person shall be prosecuted for offenses in participation in war measures prior to the signing of the armistice.

7. All civil and military personnel at present employed on them shall remain. Five thousand locomotives, one hundred fifty thousand wagons and five thousand motor lorries in good working order with all necessary spare parts and fittings shall be delivered to the associated Powers within the period fixed for the evacuation of Belgium and Luxemburg. The railways of Alsace-Lorraine shall be handed over within thirty-six days, together with all pre-war personnel and material. Further material necessary for the working of railways in the country on the left bank of the Rhine shall be left in situ. All stores of coal and material for the upkeep of permanent ways, signals and repair shops left entire in situ and kept in an efficient state by Germany during the whole period of armistice. All barges taken from the Allies shall be restored to them. All civil and military personnel at present employed on such means of communication and transporting including waterways shall remain. A note appended regulates the details of these measures.

8. The German command shall be responsible for revealing within forty-eight hours all mines or delay acting fuses disposed on territory evacuated by the German troops and shall assist in their discovery and destruction. The German command shall also reveal all destructive measures that may have been taken (such as

poisoning or polluting of springs, wells, etc.) under penalty of reprisals.

9. The right of requisition shall be exercised by the Allies and the United States armies in all occupied territory, "subject to regulation of accounts with those whom it may concern." The upkeep of the troops of occupation in the Rhine land (excluding Alsace-Lorraine) shall be charged to the German Government.

10. An immediate repatriation without reciprocity according to detailed conditions which shall be fixed, of all Allied and United States prisoners of war. The Allied Powers and the United States shall be able to dispose of these prisoners as they wish. This condition annuls the previous conventions on the subject of the exchange of prisoners of war, including the one of July, 1918, in course of ratification. However, the repatriation of German prisoners of war interned in Holland and in Switzerland shall continue as before. The repatriation of German prisoners of war shall be regulated at the conclusion of the preliminaries of peace.

11. Sick and wounded, who cannot be removed from evacuated territory will be cared for by German personnel who will be left on the spot with the medical material required.

12. All German troops at present in any territory which before the war belonged to Roumania, Turkey or Austria-Hungary shall immediately withdraw within the frontiers of Germany as they existed on August 1, 1914. German troops now in Russian territory shall withdraw within the frontiers of Germany, as soon as the Allies, taking into account the internal situation of those territories, shall decide that the time for this has come.

13. Evacuation by German troops to begin at once and all German instructors, prisoners and civilian as well as military agents, now on the territory of Russia (as defined before 1914) to be recalled.

14. German troops to cease at once all requisitions and seizures and any other undertakings with a view to obtaining supplies intended for Germany in Roumania and Russia (as defined on August 1, 1914).

15. Renunciation of the treaties of Bucharest and Brest-Litovsk and of the supplementary treaties.

16. The Allies shall have free access to the territories evacuated by the Germans on their eastern frontier either through Danzig or by the Vistula in order to convey supplies to the populations of those territories and for the purpose of maintaining order.

17. Evacuation by all German forces operating in East Africa within a period to be fixed by the Allies.

18. Repatriation, without reciprocity, within maximum period of one month, in accordance with detailed conditions hereafter to be fixed, of all civilians interned or deported who may be citizens of other Allied or associated states than those mentioned in clause three, paragraph nineteen.

19. The following financial conditions are required: Reparation for damage done. While such armistice lasts no public securities shall be removed by the enemy which can serve as a pledge to the Allies for the recovery or repatriation of the cash deposit, in the National Bank of Belgium, and in general immediate return of all documents, specie, stocks, shares, paper money together with plant for the issue thereof, touching public or private interests in the invaded countries. Restitution of the

Russian and Roumanian gold yielded to Germany or taken by that Power. This gold to be delivered in trust to the Allies until the signature of peace.

20. Immediate cessation of all hostilities at sea and definite information to be given as to the location and movements of all German ships. Notification to be given to neutrals that freedom of navigation in all territorial waters is given to the naval and merchant marines of the Allied and associate Powers, all questions of neutrality being waived.

21. All naval and mercantile marine prisoners of war of the Allied and associated Powers in German hands to be returned without reciprocity.

22. Surrender to the Allies and the United States of America of all German submarines now existing (including all submarine cruisers and mine laying submarines), with their complete armament and equipment in ports which will be specified by the Allies and the United States of America. Those which cannot take the sea shall be disarmed of the material and personnel and shall remain under the supervision of the Allies and the United States. All the conditions of the article shall be carried into effect within fourteen days. Submarines ready for sea shall be prepared to leave German ports immediately upon orders by wireless, and the remainder at the earliest possible moment.

23. The following German surface warships which shall be designated by the Allies and the United States of America shall forthwith be disarmed and thereafter interned in neutral ports, to be designated by the Allies and the United States of America and placed under the surveillance of the Allies and the United States of

French Official Photograph.

DRAFTING THE DRASTIC TERMS OF SURRENDER

The statesmen of the Allied Powers at Versailles drafting the armistice terms, which later were accepted by the German plenipotentiaries, and virtually brought the World War to an end.

America, only caretakers being left on board, namely:

Six battle cruisers, ten battleships, eight light cruisers, including two mine layers, fifty destroyers of the most modern type. All other surface warships (including river craft) are to be concentrated in naval bases to be designated by the Allies and the United States of America, and are to be paid off and completely disarmed and placed under the supervision of the Allies and the United States of America. All vessels of the auxiliary fleet (trawlers, motor vessels, etc.) are to be disarmed. Vessels designated for internment, shall be ready to leave German ports within seven days upon direction by wireless and the military armament of all vessels of the auxiliary fleet shall be put on shore.

24. The Allies and the United States of America shall have the right to sweep all mine fields and obstructions laid by Germany outside German territorial waters, and the positions of these are to be indicated.

25. Freedom of access to and from the Baltic to be given to the naval and mercantile marine of the Allied and associated Powers. To secure this Allies and the United States of America shall be empowered to occupy all German forts, fortifications, batteries and defense works of all kinds in all the entrances from the Cattegat into the Baltic, and to sweep up all mines and obstructions within and without German territorial waters without any question of neutrality being raised, and the positions of all such mines and obstructions are to be indicated.

26. The existing blockade conditions set up by the Allies and associated Powers are to remain unchanged and all German merchant ships found at sea are to re-

main liable to capture. The Allies and the United States shall give consideration to the provisioning of Germany during the armistice to the extent recognized as necessary.

27. All naval aircraft are to be concentrated and immobilized in German bases to be specified by the Allies and the United States of America.

28. In evacuating the Belgian coasts and ports, Germany shall abandon all merchant ships, tugs, lighters, cranes and all other harbor materials, all materials for inland navigation, all aircraft and all materials and stores, all arms and armaments, and all stores and apparatus of all kinds.

29. All Black Sea ports are to be evacuated by Germany, all Russian war vessels of all descriptions seized by Germany in the Black Sea are to be handed over to the Allies and the United States of America; all neutral merchant vessels seized are to be released; all warlike and other materials of all kinds seized in those parts are to be returned and German materials as specified in clause twenty-eight are to be abandoned.

30. All merchant vessels in German hands belonging to the Allied and associated Powers are to be restored in ports to be specified by the Allies and the United States of America without reciprocity.

31. No destruction of ships or materials to be permitted before evacuation, surrender or restoration.

32. The German Government will notify neutral governments of the world, and particularly the governments of Norway, Sweden, Denmark and Holland, that all restrictions placed on the trading of their vessels with the Allied and associated countries, whether by the German

Government or by private German interests, and whether in return for specific concessions such as the export of shipbuilding materials or not, are immediately canceled.

33. No transfers of German merchant shipping of any description to any neutral flag are to take place after signature of the armistice.

34. The duration of the armistice is to be thirty days, with option to extend. During this period, on failure of execution of any of the above clauses, the armistice may be denounced by one of the contracting parties on forty-eight hours' previous notice. It is understood that the execution of Articles 3 and 18 shall not warrant the denunciation of the armistice on the ground of insufficient execution within a period fixed, except in the case of bad faith in carrying them into execution. In order to assume the execution of this convention under the best conditions, the principle of a Permanent International Armistice Commission is admitted. This commission shall act under authority of the Allied military and naval commanders-in-chief.

35. This armistice to be accepted or refused by Germany within seventy-two hours of notification.

CHAPTER V

Peace at Last

WAR came upon the world in August, 1914, with a suddenness and an impact that dazed the world. When it seemed, in 1918, that mankind had habituated himself to war and that the bloody struggle would continue until the actual exhaustion and extinction of the nations involved, peace suddenly appeared. The debacle of the Teutonic alliance was both dramatic and unexpected, except to those who knew how desperate were the conditions in the nations that were battling for autocracy. Bulgaria was first to crumble, then Turkey fell, and Austria-Hungary deserted Germany. The Kaiser and his military advisers, left alone, appealed to the Allies through President Wilson, for an armistice during which peace terms might be negotiated. Prince Maximilian of Baden, a statesman

THE FAMOUS WITHERED ARM

A most unusual photograph of the ex-Kaiser showing his withered left arm. The sale of this picture was prohibited in Germany. Posterity will regard him as more responsible than any other human being for the sacrifices of millions of lives in the great war. The other figure is the Hetman of the Ukraine Skoropadski.

whose liberal ideas were rumored rather than demonstrated, was chosen to open negotiations. President Wilson, acting in concert with the Allies, referred Prince Maximilian to Marshal Foch.

While negotiations were pending, a cabled message was received on November 7th to the effect that the armistice had been signed and that all soldiers would cease fighting on two o'clock of that afternoon. It was a false report, but it spread with incredible speed throughout the country. Celebrations which included virtually every American, made the country a gala place for twenty-four hours. The American people with characteristic good nature laughed at the hoax next day and settled down in patience to await the inevitable declaration of an armistice.

The true report arrived about three o'clock, Eastern time, in the morning of November 11th. Shrieks of whistles, the booming of cannon, and the clangor of bells, awoke millions of sleeping persons, many of whom trooped into the streets to mingle their rejoic-

ings with those of their neighbors. For a day there was high carnival in town and country throughout the land, then the nation settled down to face the imminent problems of reconstruction.

One of these had to do with the immediate reduction of government expenditures during the approaching year. President Wilson had appealed to the voters to elect a Democratic Congress as an evidence of approval for his administration. The reply was a Republican House of Representatives and a Republican Senate.

The Congress that had been in continuous session since America entered the war, ended its labors in mid-November.

For length, bulk of appropriations for the war and the number and importance of legislative measures passed, the session was unprecedented.

Appropriations passed aggregated $36,298,000,000, making the total for this Congress more than $45,000,000,000, of which $19,412,000,000 was appropriated at the first (an ex-

tra) session, at which war was declared on Germany.

Legislation passed included bills authorizing billions of Liberty bonds; creation of the War Finance Corporation; government control of telegraphs, telephones and cables; executive reorganization of government agencies, and extensions of the espionage act and the army draft law by which men between eighteen and forty-five years of age were required to register.

Prohibition and woman suffrage furnished sharp controversies throughout the session. The war-time "dry" measure was completed, but after the woman suffrage constitutional amendment resolution had been adopted, January 10th, by the House, it was defeated in the Senate by two votes.

Every man, woman and child in the belligerent nations owed almost seven times as much money when peace came as he did at the beginning of the war.

Figures of the war's cost to the world compiled by the Federal Reserve Board were sum-

marized in the statement that the approximate public debt per capita had increased from $60 before the war to almost $400 at the end of July, 1918. To this was added the cost since July, which is at the highest rate of the entire period.

The direct cost of the war was calculated by the board at somewhere between $170,000,000,000 and $180,000,000,000, not taking into account the authorization of the debt or the cost of indemnities.

Four-fifths of the huge burden fell upon the shoulders of the future, only Great Britain and America absorbing a considerable amount by taxation.

The total debt of the seven principal belligerents before the war did not exceed $25,000,000,000.

The board contrasted these figures with the total value of the gold and silver extracted from the earth since the beginning of the world, which, it said, hardly exceeded $30,000,000,000.

The belligerent nations, therefore, owed

THE STRUGGLE FOR ARMENTIERES

Allied forces holding up a German attack on the Lys Canal. Airplanes flying low peppered the Germans with machine guns and broke up their concentrations, aiding greatly in the severe repulse of the attacking Huns.

about six times the amount of all the gold and silver produced in all time.

Prices rose to three times the average of what they were at the beginning of the war.

Great Britain's debt increased almost ten times over in the period of the war, or from $3,580,000,000 to $32,450,000,000 down to June, 1918. These figures do not include the debts of Australia, Canada, New Zealand and South Africa, British colonies.

France's debt was quadrupled by the beginning of 1918, increasing from $6,833,000,000 to $25,410,000,000.

Italy's debt rose from $2,929,000,000 to $6,-918,000,000.

Figures for Russia were brought up only to September, 1917, but they showed that at that time she owed $26,287,000,000, as compared with $5,234,000,000 at the beginning of the war.

The public debt of the United States was calculated to January 1, 1918, in order to be in line with those of other countries, increasing by

that date to over $8,000,000,000 from a pre-war figure of a billion and a quarter. Since that time $11,500,000,000 have been subscribed to the Liberty Loans, thus increasing the national debt about sixteen fold.

The most extraordinary increase of all was that of Germany, rising from $1,208,000,000 to $26,332,000,000.

Austria owed $2,736,000,000 at the beginning of the war, which was increased by June, 1917, to $11,573,000,000.

Hungary increased her debt from $1,392,000,000 to $5,910,000,000 by December, 1917.

The neutrals, Denmark, Spain, Holland, Norway, Sweden and Switzerland together owed $2,871,000,000 when war began and increased their debts only to $3,710,000,000.

Existing war obligations of the United States at the close of 1918 matured as follows:

First Liberty Loan, $2,000,000,000, redeemable at the option of the Treasury after 1932 and payable not later than 1947; Second Liberty Loan, $3,808,000,000, redeemable after 1927, payable in 1942; Third Liberty

Loan, $4,176,000,000, redeemable and payable without option in 1928; Fourth Liberty Loan, $6,989,047,000, redeemable after 1933, payable in 1938; War Savings, $879,300,000 up to November, 1918, payable in 1923.

With this program of maturity, the Treasury by exercising its option could call in the nation's war debt for redemption in installments every five years until 1947.

Secretary of the Treasury, William Gibbs McAdoo, who was also Director General of Transportation, created a sensation when he resigned both offices in November, 1918, the resignation to take effect January 1, 1919. Coming upon the eve of the peace conference in Paris and the announcement that President Wilson intended to head the American delegates to the conference, the resignation caused widespread surprise. The reasons given by Mr. McAdoo were ill-health and a serious depreciation of his private fortune during his incumbency of governmental positions.

Following the armistice, steps were immediately taken for the repatriation of a consider-

able portion of the American forces in France and the return to their homes of the men in American training camps. The Third Army of the United States, commanded by General Dickman, was ordered to the western shore of the Rhine, there to co-operate with the troops of the Allies until the conclusion of peace negotiations.

The country was amazed on November 23d when General March announced that the casualties of the American forces which had been anticipated as being less than 100,000, had in reality exceeded 236,000. Explanation for this lay in the fierce on-rush of the American forces during the last month of the war.

A forecast that many thousands of American boys would remain in France was given by Andre Tardieu, General Commissioner for Franco-American affairs, when addressing the Association of Foreign Correspondents in New York City, after the armistice had been signed.

This was one of the great by-products of the war. Thousands of young Americans, vigorous evangels of democratic thought, remained

DOWNING A SAUSAGE

A German observation balloon destroyed by bombs dropped from an airplane. In the car beneath the balloon is the German observer officer about to jump for his life supported by his parachute.

in Europe to bring American ideals and American force into the affairs of the old world.

Those who returned were formidable factors in re-shaping the affairs of the nation. Grave injustices were done in some instances to young men who had volunteered in the early days of the war through patriotic motives and who returned to find their places in industry taken by others. In the main, however, the process of absorption went forward steadily and without serious incident.

One factor making for satisfactory adjustment was the insurance system put into effect by the United States Government, affecting its war forces. Immediately following the armistice, the following announcement was made:

Preparations by the government for re-insuring the lives of soldiers and sailors on their return home have been hastened by the signing of the armistice. Although regulations have not yet been fully drafted, it is certain that each of the 4,250,000 men in the military or naval service now holding voluntary government insurance will be permitted within five years after peace is declared to convert it without further medical examination into ordinary life, twenty-pay life, endowment maturing at the age of sixty-two, or other prescribed forms of insurance.

This insurance will be arranged by the government, not by private companies, and the cost is expected to be at least one-fourth less than similar forms offered by private agencies. The low cost will result from the fact that the government will pay all overhead administration expenses, which, for private companies, amount to about seventeen per cent of premium receipts; will save the usual solicitation fees and, in addition, bear the risk resulting from the wounding or weakening of men while in the service. Private companies would not write insurance on many wounded men, or their rates would be unusually high.

The government will arrange to collect premiums monthly, if men wish to pay that way, or for longer periods in advance. This may be done through post-offices. The minimum amount of insurance to be issued probably will be $1,000, and the maximum $10,000, with any amount between those sums in multiple of $500. There will be provision for payments in case of disability as well as death, according to the tentative plan.

Thus will be created out of the government's emergency war insurance bureau the greatest life insurance institution in the world for peace times, with more policyholders and greater aggregate risks than a half dozen of the world's biggest private companies combined. Out of the experience gained may eventually develop expansion of government insurance to old age, industrial and other forms of insurance, in the opinion of officials who have studied the subject.

Regulations for re-insuring returning soldiers and sailors are being framed by an advisory board to the military and naval section of the war risk bureau, con-

sisting of Arthur Hunter, actuary of the New York Life Insurance Company, W. A. Fraser, Omaha, of the Woodmen of the World, and F. Robertson Jones, of the Workmen's Compensation Publicity Bureau, New York.

Plans also are under consideration for allowing beneficiaries of men who have died or been killed in the service to choose between taking monthly payments over a period of twenty years or to commute these payments in a lump sum.

CHAPTER VI

America's Position in War and Peace

BY common consent of the Entente Allies, President Wilson was made the spokesman for the democracy of the world. As Lloyd George, Premier Clémenceau of France, Premier Orlando of Italy, and other Europeans recognized, his utterances most clearly and cogently expressed the principles for which civilization was battling against the Hun. More than that, these statesmen and the peoples they represented recognized that back of President Wilson were the high ideals of an America pledged to the redemption of a war-weary world.

The war produced a sterility in literature. Out of the great mass that was written, however, two productions stood out in their nobility of thought and in their classic directness of expression. These were the address before Con-

gress by President Wilson on the night of April 2, 1917, when, recognizing fully the dread responsibility of his action, he pronounced the words which led America into the World War, and the speech made by him on Monday, November 11, 1918, when addressing Congress he announced the end of the war. Other declarations of the President that will be treasured as long as democracy survives, are those enunciating the fourteen points upon which America would make peace, and two later declarations as to America's purposes.

His address of April 2d was delivered before the most distinguished assemblage ever gathered within the hall of the House of Representatives. The Supreme Court of the United States, headed by the Chief Justice, every member of the embassies then resident in Washington, the entire membership of the House and Senate, and a host of the most distinguished men and women that could crowd themselves into the great hall, listened to what was virtually America's Declaration of War.

The air was still and tragic suspense was

upon every face as the President began his address. At first he was pale as the marble rostrum against which he leaned. As he read from small sheets typewritten with his own hand, his voice grew firmer and the flush of indignation and of resolution overspread his countenance. He said:

GENTLEMEN OF THE CONGRESS:

I have called the Congress into extraordinary session because there are serious, very serious, choices of policy to be made, and made immediately, which it was neither right nor constitutionally permissible that I should assume the responsibility of making.

On the third of February last I officially laid before you the extraordinary announcement of the Imperial German Government that on and after the first day of February it was its purpose to put aside all restraints of law or of humanity and use its submarines to sink every vessel that sought to approach either the ports of Great Britain and Ireland on the western coasts of Europe or any of the ports controlled by the enemies of Germany within the Mediterranean. That had seemed to be the object of the German submarine warfare earlier in the war, but since April of last year the Imperial Government had somewhat restrained the commanders of its undersea craft in conformity with its promise then given to us that passenger boats should not be sunk and that due warning would be given to all other vessels which its submarines might seek to destroy, when no resistance

was offered or escape attempted, and care taken that their crews were given at least a fair chance to save their lives in their open boats. The precautions taken were meager and haphazard enough, as was proved in distressing instance after instance in the progress of this cruel and unmanly business, but a certain degree of restraint was observed. The new policy has swept every restriction aside. Vessels of every kind, whatever their flag, their character, their cargo, their destination, their errand, have been ruthlessly sent to the bottom without warning and without thought of help or mercy for those on board, the vessels of friendly neutrals along with those of belligerents. Even hospital ships and ships carrying relief to the sorely bereaved and stricken people of Belgium, though the latter were provided with safe conduct through the proscribed areas by the German Government itself and were distinguished by unmistakable marks of identity, have been sunk with the same reckless lack of compassion or of principle.

I was for a little while unable to believe that such things would in fact be done by any government that had hitherto subscribed to the humane practices of civilized nations. International law had its origin in the attempt to set up some law which would be respected and observed upon the seas, where no nation had right of dominion and where lay the free highways of the world. By painful stage after stage has that law been built up, with meager enough results, indeed, after all was accomplished that could be accomplished, but always with a clear view, at least, of what the heart and conscience of mankind demanded. This minimum of right the German Government has swept aside under the plea

of retaliation and necessity and because it had no weapons which it could use at sea except these which it is impossible to employ as it is employing them without

THE WAR ZONE ESTABLISHED BY GERMANY, FEBRUARY, 1917, THAT BROUGHT AMERICA INTO THE WAR

throwing to the winds all scruples of humanity or of respect for the understandings that were supposed to underlie the intercourse of the world. I am not now thinking of the loss of property involved, immense and serious

as that is, but only of the wanton and wholesale destruction of the lives of noncombatants, men, women, and children, engaged in pursuits which have always, even in the darkest periods of modern history, been deemed innocent and legitimate. Property can be paid for; the lives of peaceful and innocent people can not be. The present German submarine warfare against commerce is a warfare against mankind.

It is a war against all nations. American ships have been sunk, American lives taken, in ways which it has stirred us very deeply to learn of, but the ships and people of other neutral and friendly nations have been sunk and overwhelmed in the waters in the same way. There has been no discrimination. The challenge is to all mankind. Each nation must decide for itself how it will meet it. The choice we make for ourselves must be made with a moderation of counsel and a temperateness of judgment befitting our character and our motives as a nation. We must put excited feeling away. Our motive will not be revenge or the victorious assertion of the physical might of the nation, but only the vindication of right, of human right, of which we are only a single champion.

When I addressed the Congress on the twenty-sixth of February last I thought that it would suffice to assert our neutral rights with arms, our right to use the seas against unlawful interference, our right to keep our people safe against unlawful violence. But armed neutrality, it now appears, is impracticable. Because submarines are in effect outlaws when used as the German submarines have been used against merchant shipping, it is impossible to defend ships against their attacks as the

law of nations has assumed that merchantmen would defend themselves against privateers or cruisers, visible craft giving chase upon the open sea. It is common prudence in such circumstances, grim necessity indeed, to endeavor to destroy them before they have shown their own intention. They must be dealt with upon sight, if dealt with at all. The German Government denies the right of neutrals to use arms at all within the areas of the sea which it has proscribed, even in the defense of rights which no modern publicist has ever before questioned their right to defend. The intimation is conveyed that the armed guards which we have placed on our merchant ships will be treated as beyond the pale of law and subject to be dealt with as pirates would be. Armed neutrality is ineffectual enough at best; in such circumstances and in the face of such pretensions it is worse than ineffectual: it is likely only to produce what it was meant to prevent; it is practically certain to draw us into the war without either the rights or the effectiveness of belligerents. There is one choice we can not make, we are incapable of making: we will not choose the path of submission and suffer the most sacred rights of our nation and our people to be ignored or violated. The wrongs against which we now array ourselves are no common wrongs; they cut to the very roots of human life.

With a profound sense of the solemn and even tragical character of the step I am taking and of the grave responsibilities which it involves, but in unhesitating obedience to what I deem my constitutional duty, I advise that the Congress declare the recent course of the Imperial German Government to be in fact nothing less

Inspection of arms before going into action. Colored troops were in many battles with the Germans and succeeded in beating the enemy in every instance.

than war against the government and people of the United States; that it formally accept the status of belligerent which has thus been thrust upon it; and that it take immediate steps not only to put the country in a more thorough state of defense but also to exert all its power and employ all its resources to bring the Government of the German Empire to terms and end the war.

What this will involve is clear. It will involve the utmost practicable co-operation in counsel and action with the governments now at war with Germany, and, as incident to that, the extension to those governments of the most liberal financial credits, in order that our resources may so far as possible be added to theirs. It will involve the organization and mobilization of all the material resources of the country to supply the materials of war and serve the incidental needs of the nation in the most abundant and yet the most economical and efficient way possible. It will involve the immediate full equipment of the navy in all respects but particularly in supplying it with the best means of dealing with the enemy's submarines. It will involve the immediate addition to the armed forces of the United States already provided for by law in case of war at least five hundred thousand men, who should, in my opinion, be chosen upon the principle of universal liability to service, and also the authorization of subsequent additional increments of equal force so soon as they may be needed and can be handled in training. It will involve also, of course, the granting of adequate credits to the Government, sustained, I hope, so far as they can equitably be sustained by the present generation, by well conceived taxation.

I say sustained so far as may be equitable by taxation

because it seems to me that it would be most unwise to base the credits which will now be necessary entirely on money borrowed. It is our duty, I most respectfully urge, to protect our people so far as we may against the very serious hardships and evils which would be likely to arise out of the inflation which would be produced by vast loans.

In carrying out the measures by which these things are to be accomplished we should keep constantly in mind the wisdom of interfering as little as possible in our own preparation and in the equipment of our own military forces with the duty—for it will be a very practical duty—of supplying the nations already at war with Germany with the materials which they can obtain only from us or by our assistance. They are in the field and we should help them in every way to be effective there.

I shall take the liberty of suggesting, through the several executive departments of the Government, for the consideration of your committees, measures for the accomplishment of the several objects I have mentioned. I hope that it will be your pleasure to deal with them as having been framed after very careful thought by the branch of the Government upon which the responsibility of conducting the war and safeguarding the nation will most directly fall.

While we do these things, these deeply momentous things, let us be very clear, and make very clear to all the world what our motives and our objects are. My own thought has not been driven from its habitual and normal course by the unhappy events of the last two months, and I do not believe that the thought of the nation has been altered or clouded by them. I have ex-

actly the same things in mind now that I had in mind when I addressed the Senate on the 22d of January last; the same that I had in mind when I addressed the Congress on the 3d of February and on the 26th of February. Our object now, as then, is to vindicate the principles of peace and justice in the life of the world as against selfish and autocratic power and to set up amongst the really free and self-governed peoples of the world such a concert of purpose and of action as will henceforth ensure the observance of those principles. Neutrality is no longer feasible or desirable where the peace of the world is involved and the freedom of its peoples, and the menace to that peace and freedom lies in the existence of autocratic governments backed by organized force which is controlled wholly by their will, not by the will of their people. We have seen the last of neutrality in such circumstances. We are at the beginning of an age in which it will be insisted that the same standards of conduct and of responsibility for wrong done shall be observed among nations and their governments that are observed among the individual citizens of civilized states.

We have no quarrel with the German people. We have no feeling towards them but one of sympathy and friendship. It was not upon their impulse that their government acted in entering this war. It was not with their previous knowledge or approval. It was a war determined upon as wars used to be determined upon in the old, unhappy days when peoples were nowhere consulted by their rulers and wars were provoked and waged in the interest of dynasties or of little groups of ambitious men who were accustomed to use their fellow men

as pawns and tools. Self-governed nations do not fill their neighbor states with spies or set the course of intrigue to bring about some critical posture of affairs which will give them an opportunity to strike and make conquest. Such designs can be successfully worked out only under cover and where no one has the right to ask questions. Cunningly contrived plans of deception or aggression, carried, it may be, from generation to generation, can be worked out and kept from the light only within the privacy of courts or behind the carefully guarded confidences of a narrow and privileged class. They are happily impossible where public opinion commands and insists upon full information concerning all the nation's affairs.

A steadfast concert for peace can never be maintained except by a partnership of democratic nations. No autocratic government could be trusted to keep faith within it or observe its covenants. It must be a league of honor, a partnership of opinion. Intrigue would eat its vitals away; the plottings of inner circles who could plan what they would and render account to no one would be a corruption seated at its very heart. Only free peoples can hold their purpose and their honor steady to a common end and prefer the interests of mankind to any narrow interest of their own.

Does not every American feel that assurance has been added to our hope for the future peace of the world by the wonderful and heartening things that have been happening within the last few weeks in Russia? Russia was known by those who knew it best to have been always in fact democratic at heart, in all the vital habits of her thoughts, in all the intimate relationships of her

people that spoke their natural instinct, their habitual attitude towards life. The autocracy that crowned the summit of her political structure, long as it had stood and terrible as was the reality of its power, was not in fact Russian in origin, character, or purpose; and now it has been shaken off and the great, generous Russian people have been added in all their native majesty and might to the forces that are fighting for freedom in the world, for justice, and for peace. Here is a fit partner for a League of Honor.

One of the things that has served to convince us that the Prussian autocracy was not and could never be our friend is that from the very outset of the present war it has filled our unsuspecting communities and even our offices of government with spies and set criminal intrigues everywhere afoot against our national unity of counsel, our peace within and without, our industries and our commerce. Indeed it is now evident that its spies were here even before the war began; and it is unhappily not a matter of conjecture but a fact proved in our courts of justice that the intrigues which have more than once come perilously near to disturbing the peace and dislocating the industries of the country have been carried on at the instigation, with the support, and even under the personal direction of official agents of the Imperial Government accredited to the Government of the United States. Even in checking these things and trying to extirpate them we have sought to put the most generous interpretation possible upon them because we knew that their source lay, not in any hostile feeling or purpose of the German people towards us (who were, no doubt as ignorant of them as we ourselves were), but

only in the selfish designs of a government that did what it pleased and told its people nothing. But they have played their part in serving to convince us at last that that government entertains no real friendship for us and means to act against our peace and security at its convenience. That it means to stir up enemies against us at our very doors the intercepted note to the German Minister at Mexico City is eloquent evidence.

We are accepting the challenge of hostile purpose because we know that in such a government, following such methods, we can never have a friend; and that in the presence of its organized power, always lying in wait to accomplish we know not what purpose, there can be no assured security for the democratic governments of the world. We are now about to accept gauge of battle with this natural foe to liberty and shall, if necessary, spend the whole force of the nation to check and nullify its pretensions and its power. We are glad, now that we see the facts with no veil of false pretense about them, to fight thus for the ultimate peace of the world and for the liberation of its peoples, the German peoples included: for the rights of nations great and small and the privilege of men everywhere to choose their way of life and of obedience. The world must be made safe for democracy. Its peace must be planted upon the tested foundations of political liberty. We have no selfish ends to serve. We desire no conquest, no dominion. We seek no indemnities for ourselves, no material compensation for the sacrifices we shall freely make. We are but one of the champions of the rights of mankind. We shall be satisfied when those rights have been made

as secure as the faith and the freedom of nations can make them.

Just because we fight without rancor and without selfish object, seeking nothing for ourselves but what we shall wish to share with all free peoples, we shall, I feel confident, conduct our operations as belligerents without passion, and ourselves observe with proud punctilio the principles of right and of fair play we profess to be fighting for.

I have said nothing of the governments allied with the Imperial Government of Germany because they have not made war upon us or challenged us to defend our right and our honor. The Austro-Hungarian Government has, indeed, avowed its unqualified endorsement and acceptance of the reckless and lawless submarine warfare adopted now without disguise by the Imperial German Government, and it has therefore not been possible for this government to receive Count Tarnowski, the Ambassador recently accredited to this government by the Imperial and Royal Government of Austria-Hungary; but that government has not actually engaged in warfare against citizens of the United States on the seas, and I take the liberty, for the present at least, of postponing a discussion of our relations with the authorities at Vienna. We enter this war only where we are clearly forced into it because there are no other means of defending our rights.

It will be all the easier for us to conduct ourselves as belligerents in high spirit of right and fairness because we act without animus, not in enmity towards a people or with the desire to bring any injury or disadvantage

upon them, but only in armed opposition to an irresponsible government which has thrown aside all considerations of humanity and of right and is running amuck. We are, let me say again, the sincere friends of the German people, and shall desire nothing so much as the early re-establishment of intimate relations of mutual advantage between us—however hard it may be for them, for the time being, to believe that this is spoken from our hearts. We have borne with their present government through all these bitter months because of that friendship—exercising a patience and forbearance which would otherwise have been impossible. We shall, happily, still have an opportunity to prove that friendship in our daily attitude and actions towards the millions of men and women of German birth and native sympathy who live amongst us and share our life, and we shall be proud to prove it towards all who are in fact loyal to their neighbors and to the government in the hour of test. They are, most of them, as true and loyal Americans as if they had never known any other fealty or allegiance. They will be prompt to stand with us in rebuking and restraining the few who may be of a different mind and purpose. If there should be disloyalty, it will be dealt with with a firm hand of stern repression; but, if it lifts its head at all, it will lift it only here and there and without countenance except from a lawless and malignant few.

It is a distressing and oppressive duty, Gentlemen of the Congress, which I have performed in thus addressing you. There are, it may be, many months of fiery trial and sacrifice ahead of us. It is a fearful thing to lead this great peaceful people into war, into the most

WHILE THE AMERICANS STOOD BEFORE METZ

After the capitulation of the 7th Medal contest, General Pershing's [illegible] took of invading Germany. This photo shows a group of American soldiers gathered about the entrance to one of their dugouts.

terrible and disastrous of all wars, civilization itself seeming to be in the balance. But the right is more precious than peace, and we shall fight for the things which we have always carried nearest our hearts—for democracy, for the right of those who submit to authority to have a voice in their own governments, for the rights and liberties of small nations, for a universal dominion of right by such a concert of free peoples as shall bring peace and safety to all nations and make the world itself at last free. To such a task we can dedicate our lives and our fortunes, everything that we are and everything that we have, with the pride of those who know that the day has come when America is privileged to spend her blood and her might for the principles that gave her birth and happiness and the peace which she has treasured. God helping her, she can do no other.

His address to Congress on November 11, 1918, while all the Allied Nations were celebrating with exultant hearts the victory that had come to them, was no less dramatic than the speech that had marked the beginning of the war. He prefaced it by reading the drastic terms of the armistice granted to Germany. Continuing he said:

The war thus comes to an end; for, having accepted those terms of armistice, it will be impossible for the German command to renew it.

It is not now possible to assess the consequences of this great consummation. We know only that this tragical war, whose consuming flames swept from one nation to another until all the world was on fire, is at an end and that it was the privilege of our own people to enter it at its most critical juncture in such fashion and in such force as to contribute, in a way of which we are all deeply proud, to the great result. We know, too, that the object of the war is attained; the object upon which all free men had set their hearts; and attained with a sweeping completeness which even now we do not realize. Armed imperialism such as the men conceived who were but yesterday the masters of Germany is at an end, its illicit ambitions engulfed in black disaster. Who will now seek to revive it?

The arbitrary power of the military caste of Germany which once could secretly and of its own single choice disturb the peace of the world is discredited and destroyed. And more than that—much more than that—has been accomplished. The great nations which associated themselves to destroy it have now definitely united in the common purpose to set up such a peace as will satisfy the longing of the whole world for disinterested justice, embodied in settlements which are based upon something much better and more lasting than the selfish competitive interests of powerful states. There is no longer conjecture as to the objects the victors have in mind. They have a mind in the matter, not only, but a heart also. Their avowed and concerted purpose is to satisfy and protect the weak as well as to accord their just rights to the strong.

The humane temper and intention of the victorious

governments have already been manifested in a very practical way. Their representatives in the Supreme War Council at Versailles have by unanimous resolution assured the peoples of the Central Empires that everything that is possible in the circumstances will be done to supply them with food and relieve the distressing want that is in so many places threatening their very lives; and steps are to be taken immediately to organize these efforts at relief in the same systematic manner that they were organized in the case of Belgium. By the use of idle tonnage of the Central Empires it ought presently to be possible to lift the fear of utter misery from their oppressed populations and set their minds and energies free for the great and hazardous tasks of political reconstruction which now face them on every hand. Hunger does not breed reform; it breeds madness and all the ugly distempers that make an ordered life impossible.

For with the fall of the ancient governments, which rested like an incubus on the peoples of the Central Empires, has come political change not merely, but revolution; and revolution which seems as yet to assume no final and ordered form, but to run from one fluid change to another, until thoughtful men are forced to ask themselves, with what governments and of what sort are we about to deal in the making of the covenants of peace? With what authority will they meet us, and with what assurance that their authority will abide and sustain securely the international arrangements into which we are about to enter? There is here matter for no small anxiety and misgiving. When peace is made, upon whose promises and engagements besides our own is it to rest?

Let us be perfectly frank with ourselves and admit that these questions cannot be satisfactorily answered now or at once. But the moral is not that there is little hope of an early answer that will suffice. It is only that we must be patient and helpful and mindful above all of the great hope and confidence that lie at the heart of what is taking place. Excesses accomplish nothing. Unhappy Russia has furnished abundant recent proof of that. Disorder immediately defeats itself. If excesses should occur, if disorder should for a time raise its head, a sober second thought will follow and a day of constructive action, if we help and do not hinder.

The present and all that it holds belongs to the nations and the peoples who preserve their self-control and the orderly processes of their governments; the future to those who prove themselves the true friends of mankind. To conquer with arms is to make only a temporary conquest; to conquer the world by earning its esteem is to make permanent conquest. I am confident that the nations that have learned the discipline of freedom and that have settled with self-possession to its ordered practice are now about to make conquest of the world by the sheer power of example and of friendly helpfulness.

The peoples who have but just come out from under the yoke of arbitrary government and who are now coming at last into their freedom will never find the treasures of liberty they are in search of if they look for them by the light of the torch. They will find that every pathway that is stained with the blood of their own brothers leads to the wilderness, not to the seat of their hope. They are now face to face with their initial test.

We must hold the light steady until they find themselves. And in the meantime, if it be possible, we must establish a peace that will justly define their place among the nations, remove all fear of their neighbors and of their former masters, and enable them to live in security and contentment when they have set their own affairs in order. I, for one, do not doubt their purpose or their capacity. There are some happy signs that they know and will choose the way of self-control and peaceful accommodation. If they do, we shall put our aid at their disposal in every way that we can. If they do not, we must await with patience and sympathy the awakening and recovery that will assuredly come at last.

FOURTEEN PRINCIPLES OF PEACE

On Tuesday, January 8, 1918, President Wilson placed the peace terms of the United States Government before both houses of Congress, in joint session. The fourteen principles were:

1. Open covenants of peace, openly arrived at, after which there shall be no private international understanding of any kind, but diplomacy shall proceed always frankly and in the public view.

2. Absolute freedom of navigation upon the seas, outside territorial waters, alike in peace and war, except as the seas may be closed in whole or in part by international action for the enforcement of international covenants.

3. The removal, so far as possible, of all economic barriers and the establishment of an equality of trade conditions among all the nations consenting to the peace and associating themselves for its maintenance.

4. Adequate guarantees given and taken that national armaments will be reduced to the lowest point consistent with domestic safety.

5. A free, open-minded and absolutely impartial adjustment of all Colonial claims based upon a strict observance of the principle that in determining all such questions of sovereignty, the interests of the populations concerned must have equal weight with the equitable claims of the government whose title is to be determined.

6. The evacuation of all Russian territory and such a settlement of all questions affecting Russia as will secure the best and freest co-operation of the other nations of the world in obtaining for her an unhampered and unembarrassed opportunity for the independent determination of her own political development and national policy, and assure her of a sincere welcome into the society of free nations under institutions of her own choosing; and, more than a welcome, assistance also of every kind that she may need and may herself desire. The treatment accorded Russia by her sister nations in the months to come will be the acid test of their good will, of their comprehension of her needs, as distinguished from their own interests, and of their intelligent and unselfish sympathy.

7. Belgium, the whole world will agree, must be evacuated and restored, without any attempt to limit the sovereignty which she enjoys in common with all other free nations. No other single act will serve as this will

serve to restore confidence among the nations in the laws which they have themselves set and determined for the government of their relations with one another. Without this healing act the whole structure and validity of international law is forever impaired.

8. All French territory should be freed and the invaded portions restored, and the wrong done to France by Prussia in 1871, in the matter of Alsace-Lorraine, which has unsettled the peace of the world for nearly fifty years, should be righted, in order that peace may once more be made secure in the interests of all.

9. A readjustment of the frontiers of Italy should be effected along clearly recognized lines of nationality.

10. The peoples of Austria-Hungary, whose place among the nations we wish to see safeguarded and restored, should be accorded the freest opportunity of autonomous development.

11. Roumania, Serbia and Montenegro should be evacuated, occupied territories restored; Serbia accorded free and secure access to the sea, and the relations of the several Balkan States to one another determined by friendly counsel along historically established lines of allegiance and nationality; and international guarantees of the political and economic independence and territorial integrity, of the several Balkan States, should be entered into.

12. The Turkish portion of the present Ottoman Empire should be assured a secure sovereignty, but the other nationalities which are now under Turkish rule, should be assured an undoubted security of life and an absolutely unmolested opportunity of autonomous development, and the Dardanelles should be permanently

opened as a free passage to the ships and commerce of all nations under international guarantees.

13. An independent Polish State should be erected which should include the territories inhabited by indisputably Polish populations, which should be assured a free and secure access to the sea, and whose political and economic independence and territorial integrity should be guaranteed by international covenants.

14. General association of nations must be formed under specific covenants for the purpose of affording mutual guarantees of political independence and territorial integrity to great and small states alike.

President Wilson in his address to Congress on February 11, 1918, presented these four principles which are to be applied in arranging world peace:

1. That each part of the final settlement must be based upon the essential justice of that particular case and upon such adjustments, as are most likely to bring a peace that will be permanent.

2. That peoples and provinces are not to be bartered about from sovereignty to sovereignty as if they were mere chattels and pawns in a game, even the great game now forever discredited, of the balance of power; but that

3. Every territorial settlement must be made in the interest and for the benefit of the populations concerned, and not as part of any mere adjustment or compromise of claims amongst rival states; and,

4. That all well-defined national aspirations shall be accorded the utmost satisfaction that can be accorded them without introducing new or perpetuating old elements of discord and antagonism that would be likely in time to break the peace of Europe and consequently of the world.

President Wilson, in his Liberty Loan address in New York on September 27th, thus stated this government's interpretation of its duty with regard to peace:

1. The impartial justice meted out must involve no discrimination between those to whom we wish to be just and those to whom we do not wish to be just. It must be a justice that plays no favorites and knows no standard but the equal rights of the several peoples concerned;

2. No special or separate interest of any single nation or any group of nations can be made the basis of any part of the settlement which is not consistent with the common interests of all;

3. There can be no leagues or alliances or special covenants and understandings within the general and common family of the League of Nations;

4. And more specifically, there can be no special, selfish economic combinations within the league and no employment of any form of economic boycott or exclusion except as the power of economic penalty by exclusion from the markets of the world may be vested in the

League of Nations itself as a means of discipline and control.

5. All international agreements and treaties of every kind must be made known in their entirety to the rest of the world.

CHAPTER VII

The War by Years

GERMANY'S military strength developed during forty years of preparation, and the offensive plans of the German High Command developed in connection with an extraordinary spy service in France, Belgium, Russia, England and the United States, culminated in a simultaneous campaign on land and by sea, affecting these five nations.

AUGUST 1, 1914–AUGUST 1, 1915

Belgium and Northern France were overrun by a German invading force under General von Kluck. The heroic effort of the French army under General Joffre and a supreme strategic thrust at the German center by General Foch turned back the German tide at the battle of the Marne. The scientific diabolism of the

German High Command was revealed when poison gas was projected against the Canadians at Ypres, torturing, blinding and killing thousands.

German terrorism on the high seas culminated in the sinking of the Cunard liner Lusitania by a German submarine off the Irish coast. Men, women and children to the number of 1,152 lost their lives. Of these 102 were Americans.

German colonies in South Africa were invaded by British South African troops under General Louis Botha, who during the Boer War commanded a division against the British. The German holdings at Tsing-Tau and in the Marshall Islands were seized by Japan.

German cruisers that had raided sea-going commerce were destroyed. The most noted of these was the Emden, which was defeated and destroyed by the Australian cruiser Sydney off the Cocos Islands.

German sea power was further humiliated in a running fight off Helgoland in which the battle cruiser Blücher was sunk and in a battle off

the Falkland Islands in which three German cruisers were destroyed.

Italy entered the war on May 23, 1915, and invaded Austria on a sixty-mile front. Russian forces, after early successes, were defeated at Tannenburg by von Hindenburg, the outstanding military genius on the German side.

The development of aircraft as an aid to artillery and as a destructive force on its own account, was rapid, and the use of machine guns and hand grenades in trench operations became general.

AUGUST 1, 1915–AUGUST 1, 1916

The tragic sea and land operations at the Dardanelles and Gallipoli marked this year with red in British history. Sir Douglas Haig succeeded Sir John French as Commander-in-Chief of British forces in France. The outstanding operation of the British forces on the western front was the bloody battle of the Somme, beginning July 1st, and continuing until the fall of 1915. The losses on both sides in that titanic struggle staggered two conti-

nents. Especially heroic were the attacks of the Canadians in that great battle and especially heavy were the losses in killed and wounded of the Canadian regiments. They ranked in magnitude with the depletion that came to the Australian and New Zealand armies in the fatal Gallipoli campaign.

This year will be glorious forever in the annals of France because of the heroic defense at Verdun. That battle tested to the limit the offensive strength of the German machine and it was found lacking in power to pierce the superhuman defense of the heroic French forces under Pétain and Nivelle.

Bulgaria entered the war on October 14, 1915, with a declaration of war against helpless Serbia. Greece, torn by internal dissensions, inclined first to one side, then to the other. The occupation of Saloniki by French and British expeditionary forces finally swung the archipelago to the Allies.

A British Mesopotamian force under General Townshend, poorly equipped and unsupported, was cut off in Kut-el-Amara, and sur-

rendered to the Turks on April 29, 1916, after a long siege.

The Italian forces under General Cadorna made a sensational advance terminating in the capture of Gorizia. Portugal entered the war on the side of the Allies after it had refused to give up to Germany several German ships that had been interned in Portuguese ports.

An object lesson in German submarine possibilities was given America when the Deutschland, a super-submarine cargo vessel, arrived in Baltimore, Maryland, on July 9, 1916. The Deutschland later was converted into a naval submarine and re-visited American shores, sinking a number of merchant vessels. It was one of the German submarine fleet surrendered to the Allies in November, 1918.

Russia proved itself to be a military ineffective. German armies under von Mackensen and von Hindenburg occupied Warsaw, Brest-Litovsk, Lutsk, and Grodno. Grand Duke Nicholas was removed from the command of the Russian armies and Czar Nicholas assumed command.

Germany's pretensions to sea power ended with the battle of Jutland, May 31, 1916, when its High Seas fleet fled after a running fight with British cruisers and destroyers. Never, thereafter, during the war did the German ships venture out of the Bight of Helgoland.

AUGUST 1, 1916–AUGUST 1, 1917

This year was marked by two dramatic episodes. The first of these was the sudden entrance and the equally sudden exit of Roumania as a factor in the World War.

The second was the appearance of the United States which became the deciding factor in the war.

Roumania created enthusiasm in Allied countries when it declared war on Austria-Hungary August 27th. A sudden descent by a Roumanian army into Transylvania on August 30th was hailed as the harbinger of further successes. These hopes were turned to ashes when von Mackensen headed an irresistible German and Austrian rush which fairly inundated Roumania. The retreat from

Transylvania by the Roumanians was turned into a rout. Bulgarian forces invaded the Dobrudja region of Roumania and on November 28th the seat of the Roumanian Government was transferred from Bucharest, the capital, to Jassy. Roumania ceased to be a factor in the war on December 6th, when Bucharest fell to von Mackensen. Emperor Franz Josef of Austria-Hungary died on November 22d, while Austrian hopes were at their highest.

America's appearance as a belligerent was forecast on January 31, 1917, when Germany announced its intention of sinking all vessels in a blockade zone around the British Isles. Count von Bernstorff was handed his passports on February 3d, and on April 2d President Wilson, in a remarkable address to Congress, advised a declaration of war by the United States against Germany. This was consummated by a formal vote of Congress declaring war on April 6th.

This action by America was followed by the organization of a Council of National Defense. Under this body the resources of the nation

were mobilized. The council was later virtually abandoned as an organizing factor, its functions going to the War Industries Board, presided over by Bernard Baruch; the Fuel Administration, under Dr. Harry A. Garfield; the War Trade Board, with Vance C. McCormick at its head; and other governmental bodies. George Creel headed the Committee on Public Information.

Conscription was decided upon as the foundation of America's war-making policy, and the training of officers and privates in great training camps was commenced. Great shipping and aircraft programs were formulated and the nation as a whole was placed upon a war footing.

The Russian revolution, beginning in bread riots in Petrograd, spread throughout that country, with the result that Russia disappeared as one of the Entente Allies.

FROM AUGUST 1, 1917–NOVEMBER 11, 1918

America's might and efficiency were revealed in the speed and thoroughness with which her

military, naval and civilian resources were mobilized and thrown into the conflict. Under the supervision of the Chief of Staff, two million American soldiers received the final touches in their military training and were transported safely overseas. They became the decisive factor in the war during the summer and fall of 1918. To their glory be it recorded they never retreated. St. Mihiel, Siecheprey, Boureches Wood, Belleau Wood, the Argonne, Sedan and Stenay are names that will rank in American history with Yorktown, New Orleans and Gettysburg. The "land of dollars" became over night the "land of high ideals" to the civilized world. Lightless nights in cities, restriction of the use of gasoline on Sundays and daylight-saving legislation linked civilians to soldiers in war effort.

Italy suffered a severe reverse beginning October 24, 1917, when the German forces rushed through a portion of the Italian army that had been honey-combed with pro-German Socialistic propaganda.

Canada again emblazoned its name in his-

tory through the heroic capture of Passchendaele on November 6, 1917.

The Russian revolution turned to the Bolsheviki when Lenine and Trotsky at the head of the Reds seized Petrograd on November 7th and deposed Alexander Kerensky, leader of the Moderate Socialists. The Czar Nicholas was executed by the victorious Bolsheviki and the Imperial family made captives.

The British Mesopotamian forces advanced into Palestine and Mesopotamia, destroying the Turkish army under Ahmed Bey in a battle terminating September 29, 1917. General Stanley Maude, the leader of the expedition, died in Mesopotamia November 18, 1917.

General Allenby commanding British and Arabian forces, routed and destroyed three Turkish armies in Palestine, capturing Jerusalem which had been held by the Turks for six hundred and seventy-three years.

The turning point of the war came on March 29, 1918, when General Foch was chosen Commander-in-Chief of all the Allied forces. This followed Germany's great drive on a fifty-mile

front from Arras to La Fère. Successive German thrusts were halted by the Allied forces now strongly reinforced by Americans.

Foch, patiently biding his time, elected to halt the German drive with Americans. The Marines of the United States forces were given the post of honor, and at Château-Thierry the counter-thrust of Foch was commenced by a complete defeat of the Prussian Guard and other crack German regiments, by the untried soldiers of America.

From Château-Thierry to the armistice of November 11th was only a short span of time, but in it was compressed the humiliation of arrogant Teutonic imperialism, the destruction of militaristic autocracy, and the liberation of the world.

CHAPTER VIII

Behind America's Battle Line

GENERAL MARCH'S OWN STORY OF THE WORK OF THE MILITARY INTELLIGENCE DIVISION—OF THE WAR PLANS DIVISION—OF THE PURCHASE AND TRAFFIC DIVISION—HOW MEN, MUNITIONS AND SUPPLIES REACHED THE WESTERN FRONT.

IT is important that a general summary of America's military preparations, a detailed description of the operations behind the battle line and a detailed chronology of America's principal military operations in France during the year 1918 should be presented to the reader. Such a summary is afforded by the report of General Peyton C. March, Chief of Staff, United States Army, for the last year of the war. Addressing the Secretary of War, General March wrote:

The signing of the armistice on November 11, 1918, has brought to a successful conclusion the most remarkable achievement in the history of all warfare.

The entry of the United States into the war on April

6, 1917, found the Nation about as thoroughly unprepared for the great task which was confronting it as any great nation which had ever engaged in war. Starting from a minimum of organized strength, within this short period of sixteen months the entire resources of the country in men, money, and munitions have been placed under central control, and at the end of this period the Nation was in its full stride and had accomplished, from a military standpoint, what our enemy regarded as the impossible. The most important single thing, perhaps, in this record of accomplishment, was the immediate passage by Congress of the draft law, without which it would have been impossible to have raised the men necessary for victory. In organizing, training, and supplying the vast numbers of men made available by the draft law very many changes have been made necessary in the organization of the War Department and in the methods existing therein which were inherited from the times of profound peace.

Shortly after my installation as Chief of Staff I adopted the principle of interchange of the personnel of the various staff corps of the War Department with men who had training in France, and in the application of this principle placed as the heads of various bureaus officers selected on account of their ability and experience in the system of warfare as conducted in France.

At this time, also, I found that the divisions organized in our armies were still regarded as separate units, designated by different titles in accordance with their origin. This made three different kinds of divisions in the United States army—the Regular Army, the National Guard, and National army divisions. All these

distinctions were abolished and the entire army consolidated into a United States army, without regard to the source from which drawn. The source of supply of all replacements for the various elements of the army, without regard to their origin, was drafted men; and the titles had no significance whatever and were a source of possible disturbance from the standpoint of military efficiency. There was, in fact, no actual difference between these divisions with respect to efficiency—all have done high-grade work from whatever source drawn. All have shown courage and capacity for quick absorption of the fundamentals of modern military training and irresistible dash and force in actual fighting. . . .

When I returned from France on March 1, 1918, I came back with the belief that the most fundamental necessity, both for the American Expeditionary Force and for the success of the allies, was that the shipment of troops to France should be vastly increased and should have priority over everything else; and as this policy became effective a study was instituted looking to our putting in France, if that was possible, enough men to bring the war to a conclusion in the shortest period possible. After a study of the entire situation, including as accurate an estimate of the potential strength of our allies on the western front and of the probable German strength as was possible, I came to the conclusion that the war might be brought to an end in 1919, provided we were able to land in France by June 30th of that year eighty American divisions of a strength of 3,360,000 men. On July 18, 1918, I submitted to you a formal memorandum, accompanied by a study of methods by which the men could be obtained, the sup-

plies procured, and an analysis of the shipping which must be obtained in order to accomplish this very large military program. This was accompanied by an estimate of the cost of the proposed program.

In this study I recommended to you the adoption, as the American program, of eighty divisions in France and eighteen at home by June 30, 1919, based on a total strength of the American army of 4,850,000 men. This was approved by you and by the President of the United States and was adopted as our formal military program. To carry this program into effect required the adoption by Congress of a change in the draft ages so as to include men between the ages of eighteen and forty-five years, and also created a deficiency over the enormous appropriations already made by Congress of some $7,000,000,000. The presentation of the program to Congress, accompanied by the statement that this increase in the army, if laws were passed by Congress which would make it effective, would lead to success in 1919, produced prompt and favorable consideration by that body. Up to the signing of the armistice troops were being transported to France monthly in accordance with that program. The results speak for themselves. . . .

During the year, the most important in the history of the country both from a military and civil standpoint, there have been four heads of the General Staff: Major-General Hugh L. Scott, from the outbreak of the war until his retirement, September 22, 1917; General Tasker H. Bliss, from that date until May 19, 1918; Major-General John Biddle, Acting Chief of Staff at periods during the absence of General Bliss in France, from October 29, 1917, to December 16, 1917, and from

January 9, 1918, to March 3, 1918. I assumed the duties of Acting Chief of Staff on March 4, 1918, became Chief of Staff May 20, 1918, and have continued on that duty since.

It was evident, as the war progressed, that the General Staff was acting under an organization and in accordance with regulations which were not only unsuited to the duties and responsibilities confronting it, but were wholly out of date and were not suited to any General Staff organization. Successive revisions of the orders under which the General Staff was acting were made as events demanded, until the experience of the year crystallized the organization of the General Staff into that set forth in General Order No. 80 of the War Department. This order divides the work of the General Staff into four primary divisions: 1. Operations; 2. Purchase, Storage, and Traffic; 3. Military Intelligence; 4. War Plans. Each of these divisions is under the direction of a director; who is Assistant Chief of Staff and is a general officer.

OPERATIONS DIVISION

The Operations Division is under the charge of Major-General Henry Jervey, United States army, as Director of Operations and Assistant Chief of Staff. This division is a consolidation of the former Operations Committee and Equipment Committee, which pertained to the War College under the previous organization. The Operations Division has had charge of the increase in the personnel of the army during the year. On June 30, 1917, the Regular army consisted of 250,357 officers and enlisted men. On August 5, 1917, 379,323 officers and

men of the National Guard were drafted into the Federal service. There were a few special drafts of small numbers of National Guardsmen into the Federal service after August 5, 1917. During the period covered by this report this division handled the calls into service of men obtained under the draft, the organization of these men into divisions and units necessary for the army, and turned over for shipment overseas up to November 8, 1918, 2,047,667 men. The grand total of men in the army from returns for the period ending October 15th is 3,624,774. This force was organized into divisions, the proper proportion of corps, army, and service of supply troops, and of replacement camps and training centers for Infantry, Field Artillery, and Machine Guns in the United States. Central officers' training schools were organized at each of the replacement camps. Replacement camps and training centers for the various staff departments were also organized. Development battalions were organized at all division camps and large posts and camps for the purpose of developing men of poor physique and the instruction of illiterates and non-English-speaking men of the draft. During the fiscal year 5,377,468 officers and men were moved by railroad to and from the camps.

The Operations Division has during the year also handled all matters connected with the adoption of new types of equipment, fixing allowances for various units, the preparation of tables of equipment for them, and the distribution and issue of equipment, and the determination of priorities of such issue.

It has supervised and studied the needs of camps and construction work therein, and this work in general has

been characterized by marked ability and devotion to duty.

PURCHASE, STORAGE AND TRAFFIC DIVISION

The Division of Purchase, Storage and Traffic is under the charge of Major-General George W. Goethals, United States army, as Assistant Chief of Staff and Director of Purchase, Storage and Traffic. This division was organized by merging divisions previously created, and which had been called "Storage and Traffic" and "Purchase and Supply." The new division thus organized was subdivided into Embarkation Service, Storage, Inland Traffic Service, and Purchase and Supply Branch.

Embarkation.—At the outbreak of the war the Quartermaster's Department had charge of the transportation of troops and supplies and continued to exercise these functions until August 4, 1917, when they were transferred to a separate division of the General Staff, specially created for the purpose, and designated as the Embarkation Service. As already noted, this was subsequently merged with the Storage and Traffic Division.

Two primary ports of embarkation were established, one with headquarters at Hoboken, N. J., and the other at Newport News, Va., each under the command of a general officer.

The Quartermaster's Department was operating a service to Panama from New York, but with the shipment of troops to France a new condition arose which was met only in part by taking over the Hoboken piers, formerly owned by the Hamburg-American and North German Lloyd steamship companies, and the magnitude

of the undertaking necessitated additional facilities. The situation at New York is complicated by the large amount of general shipping using the port, the diversified interests, even those of the government, and the complicated jurisdiction. An effort was made to bring about such a consolidation and unification as to secure greater co-operation with increased efficiency. To this end the War Board for the Port of New York was established in November, 1917. It was vested with full power and authority to make rules and regulations for operating the facilities of the port, to determine priorities, and to do what was necessary to provide for the prompt and economical dispatch of the business of the government in and about the port. Mr. Irving T. Bush was selected as the board's representative, with the title of chief executive officer. In addition to representing the board he was to arrange for the co-operative use of piers, warehouses, lighterage, terminals, railroads, trucking, and all other transportation facilities in and about the port.

In addition the need was felt for having a shipping expert closely associated with the Embarkation Service, familiar with the facilities at various ports, so that he could properly assign ships, select ships for the cargo to be moved, and arrange for their loading. Mr. Joseph T. Lilly was selected for this work and appointed director of embarkation.

In February, 1918, the available cargo ships were not sufficient to carry the supplies needed for maintaining the troops overseas. To secure the requisite additional tonnage necessitated taking ships from the existing trade routes and determining from what imports and exports

they could best be spared without interference with those which were absolutely necessary. This brought about a new situation which could be handled only by those having a knowledge of the trades as well as the characteristics of the various ships serving them, since some of them were suitable for War Department needs and some were not. It had happened that an advantageous exchange of ships could have been made with the Allies by which valuable time could have been saved in getting over cargo, but there was lack of knowledge as well as lack of authority. The whole situation was gone over at a conference between the Secretary of War and the chairman of the Shipping Board, as a result of which the Shipping Control Committee was created, consisting of Mr. P. A. S. Franklin, chairman; Mr. H. H. Raymond; and Sir Connop Guthrie, representative of the Allies' shipping interests. The allocation and distribution of available tonnage, as well as questions of exchange of ships, was vested in this committee. So far as the work of the War Department was concerned the committee was charged with the loading and unloading cargo, coaling, supplies, repairs, and, except where vessels are commanded by the navy, of inspection and manning. They also have charge of the management and operation of docks, piers, slips, loading and discharging facilities under the control of the department, or of any board, officers, or agency operating such facilities, together with the direction and management of minor craft to be used in connection with the handling of steamers and their cargoes in port. The amount of cargo shipped overseas, the efficiency of the loading, and the reduction of the time of stay in the ports attest to the efficient man-

ner in which the committee has operated, and it is not too much to say that they are to be largely credited with the results that have been accomplished. . . .

Expeditionary depots were operated at Boston, Mass.; Philadelphia, Pa., and Baltimore, Md., primarily for the movement of freight. When cargo ships having accommodations for troops were loaded at these ports troops for the available space were sent from the camps under the direction of the commanding general at Hoboken; similarly shipments of troops were made from Montreal, Canada, and Halifax, Nova Scotia, when practicable. Cargo shipments were also made from other ports on the Atlantic and Gulf coasts.

On May 25, 1918, the water transport branch of the Quartermaster's Department was transferred and made a part of the Embarkation Service.

In April conditions abroad necessitated the speeding up shipments of troops, and brought to the service such transports as the British Government could spare for the purpose, which have been continued in use. The army transports are officered and manned by the navy, as is the greater number of the cargo ships. The arrangements for transferring ships to naval control as well as for convoys for troop and cargo ships are handled through the Chief of Operations of the navy, who has given every assistance. The way in which the work has been handled by the navy is shown by the loss of no troop ships which were under their protection on the eastbound trips. . . .

Inland Traffic.—The inland traffic service was established on January 10, 1918. As the government had taken over all of the railroads, the necessity for working

in harmony with the organization that was placed in charge was apparent, and the Railroad Administration was requested to recommend a competent traffic man to handle the work. This resulted in the selection and assignment of Mr. H. M. Adams as chief of the section. He in turn secured his expert assistants through the Railroad Administration.

At the time the section was formed approximately 15,000 carloads of War Department property held in cars were congesting various Atlantic ports. Steps were taken which relieved this condition and brought about an orderly movement of the traffic when and in the quantities desired. The value of the inland traffic service was soon demonstrated and led to a reorganization, with authority to take over the transportation organizations of the various bureaus of the War Department, both at Washington and throughout the country, so that as now organized the chief of the inland traffic service exercises direct control of the transportation of troops, of the supplies of and for the various bureaus of the War Department, and for the contractors working for the several bureaus. This control extends over the entire country through the medium of representatives stationed at various traffic centers.

Working in conjunction with the Railroad Administration has resulted in minimizing the burdens of the carriers. The work has been performed most efficiently. More than 5,000,000 troops have been moved from their homes, from one camp to another, and from camps to the points of embarkation within the period covered by this report.

Arrangements have been made by which this branch

will take charge of all express movements for the War Department, as well as the tracing of the movements of all War Department property, including the contractors and others for the various bureaus.

Purchase and Supply.—The Purchase and Supply Branch is organized into the following subsections: Supply Program, Purchase, Production, Finance, and Emergency.

MILITARY INTELLIGENCE DIVISION

The Military Intelligence Division has as director Brigadier-General Marlborough Churchill, United States army, Assistant Chief of Staff. This division, which had been a branch, first of the War Plans Division and then of the Executive Division of the General Staff, was separated completely and made an independent division by general orders which reorganized the General Staff, thus putting the Military Intelligence Division on a par with similar services of general staffs of other nations of the world.

The duties of the Military Intelligence Division consist, in general, in the organization of the intelligence service, positive and negative, including the collection and co-ordination of military information; the supervision of the department intelligence officers and intelligence officers at posts, stations, camps, and with commands in the field, in matters relating to military intelligence; the direction of counter-espionage work; the preparation of instruction in military intelligence work for the use of our forces; the consideration of questions of policy promulgated by the General Staff in all matters of military intelligence; the co-operation with intelligence branches

of the general staffs of other countries; the supervision of the training of officers for intelligence duty, the obtaining and issuing of maps; and the disbursement of and accounting for intelligence funds.

One of the important functions of the Director of the Military Intelligence Division is that of co-ordinating the work of this service with other intelligence agencies. Possible duplications of work and investigation by the State Department, Treasury Department, Department of Justice, Navy Department, War Trade Board, and the War Department are avoided or adjusted at weekly conferences held at the Department of Justice and attended by representatives of these departments who consider matters of common interest. For a similar purpose, the Director of Military Intelligence is a member of the Fire Prevention Committee, the War Industries Board, and the National Research Council.

For the purpose of securing close co-operation between the military intelligence services of the nations associated in the war, the British and French Governments were requested by the United States to send officers to this country for liaison duty. These officers have been of great assistance in accomplishing this end, because of their knowledge of the details of intelligence work in Europe.

For the performance of the service for which the Military Intelligence Division was developed, eight sections have been established, each dealing with its peculiar problems, and working in close liaison with its fellows. . . .

It may not be amiss to call attention to the enthusi-

astic co-operation which this division has consistently received from the various other intelligence agencies, civilian and others. The American Protective League, the Department of Justice, the Office of Naval Intelligence, the Customs, the War Trade Intelligence have all cooperated in the heartiest manner with each and every effort of the Military Intelligence Division. Indeed, it is hardly saying too much to state that the success of the Military Intelligence Division has in a very large measure been due to the loyal assistance which it has received at all times from the various agencies whose functions are similar to its own.

WAR PLANS DIVISION

The War Plans Division of the General Staff is under the direction of Brigadier-General Lytle Brown, as Director and Assistant Chief of Staff. A very large volume of work has been accomplished by this division during the year. Exclusive of subjects pertaining to the historical branch, the inventions section, and routine matters, 9,287 cases were handled by the division during the year.

These included studies as to policies for defense and the organization of the military forces in general as published in Tables of Organization, completed studies on the policy and plans for training the army in general, training replacement troops, training cadres, training centers, training schools, schools for senior and staff officers, and plans for physical reconstruction and vocational training of wounded soldiers.

In addition, through the Training Section, the War

Plans Division has supervision of training in general and has kept in touch by inspections by its officers with methods used and progress made.

The Legislative, Regulations, and Rules Branch of the War Plans Division has handled numerous changes in Army Regulations and War Department orders made necessary by the present emergency, and has considered bills before Congress pertaining to the army.

The Historical Branch of the General Staff was organized March 5, 1918, to collect and compile the records pertaining to the war under the approved policy, and satisfactory progress is being made. To June 30, 1918, 67,022 photographs and 2,590 feet of motion-picture film had been received.

The Inventions Sections was organized April 16, 1918. This section has taken over from the different agencies of the government the preliminary consideration of inventions and ideas of inventions of a military nature, with a view to placing before the proper bureaus of the War Department those having sufficient military value to warrant test and development at the expense of the government. From April 16, 1918, to June 30, 1918, 4,645 cases were handled, a number of which were of exceptional merit and have already been put to use.

The work of the Inventions Section is not the development of ideas or inventions, but is to give them such preliminary study and consideration as to determine whether or not development should be pursued, and to forward them, if the consideration has been favorable, to such agencies as are particularly interested in the development and have the necessary funds for the purpose.

The Chief of Staff has as his principal assistant

Major-General Frank McIntyre, United States army, who acts as executive officer for the General Staff and also for the Chief of Staff in his absence.

Beside the General Staff divisions which have been referred to in the foregoing, there has been established in the General Staff a Morale Section, under charge of Brigadier-General E. L. Munson, United States army, which has for its object primarily the stimulation of morale throughout the army, and maintaining a close connection and liaison with similar activities in civil life. This section had only gotten fairly into operation before the signing of the armistice, but had already shown its value as a military asset.

Another important addition to the organization of the General Staff has been the establishment of a Personnel Section, under charge of Brigadier-General P. P. Bishop, United States army. In this section has been consolidated the handling of appointments, promotions, and commissions of the entire official personnel of the United States army. This section has proved to be of the greatest value and has come to stay. . . .

The signing of the armistice has interrupted the conclusion of the organization now under way for the consolidation of Procurement and Storage under the Director of Purchase, Storage, and Traffic, but the principle is sound from the standpoint of organization and extremely economical in its results.

In addition to the changes indicated in the foregoing, a number of entirely new organizations have been created in the War Department. The handling of production and personnel pertaining to the Gas Service, which I found was scattered among four different staff bureaus,

was consolidated in the Chemical Warfare Service and placed under the charge of Major-General William L. Sibert, United States army, with a resulting marked increase in efficiency of the service itself.

A similar consolidation of all the motor-transport facilities, which were scattered throughout the various supply bureaus of the government, into a Motor Transport Corps, under Brigadier-General Charles B. Drake, United States army, has placed this important development of modern warfare under a sound organization.

The organization of these services in the United States was accompanied by similiar organizations in the American Expeditionary Force in France.

The supply of officers for the very large military program has been throughout one of the most important problems which confronted the General Staff. I have already indicated in the statement of the functions of the Operations Division of the General Staff the organization of central training camps for officers throughout the United States. When, however, we embarked upon the final program of placing eighty divisions in France and eighteen at home by June 30, 1919, which involved an army of approximately 4,800,000, the problem of the supply of officers became so serious that an understanding was obtained with the great mass of educational institutions throughout the United States, resulting in the development of the Student Army Training Corps. This scheme absorbed for military purposes the academic plants of some 518 colleges and universities throughout the country, and for vocational training in the army embraced some eighty more. This corps was put under the charge of Brigadier-General Robert I. Rees, United

NOTED AMERICAN GENERALS

General March is Chief of Staff of the American Army, Lieutenant-Generals Liggett and Bullard commanded the First and Second Armies respectively, and Major-Generals Wright and Read are corps commanders.

States army, and in its development we have had the energetic co-operation of college presidents and responsible college authorities throughout the entire United States. At the same time, in order to increase the supply of officers, the course at West Point was cut down to one year's intensive training, with the idea of placing at the disposal of the government 1,000 officers a year graduated from that extremely efficient plant rather than the graduation of about 200, which had been the case previously throughout the war.

The separation of the Air Service from the Signal Corps, under the provisions of the Overman bill, and the establishment of a Bureau of Military Aeronautics, under Major-General William L. Kenly, United States army, and of a Bureau of Aircraft Production, under Mr. John D. Ryan, marked an extremely important step forward in the development of this portion of the Military Establishment. The armistice closes out this matter with the two branches of the Air Service in a state of marked efficiency and establishes unquestionably the necessity for the permanent separation of the Air Service from the Signal Corps in the reorganization of the army.

During this period another new agency created in the War Department by Executive order was the office of the Chief of Field Artillery. This office has been filled by Major-General William J. Snow, United States army. This establishment was accompanied by the creation in the American Expeditionary Force in France of the office of Chief of Artillery on General Pershing's staff, having similar relation to all the artillery of the Expeditionary Force which the Chief of Field Artillery has toward the mobile artillery at home. The work of this

office has been accompanied by a marked increase in the efficiency of the training system in the various Field Artillery camps, and the office itself has proved to be of distinct value.

I have directed the divisions of the General Staff concerned to study and submit for your consideration a plan for the reorganization of our army, which will take advantage of our experience in this war, which has brought about many changes in organization of all arms of the service, and has developed new arms not known when the war started. The Air Service, the Tank Corps, the development of heavy mobile artillery, the proper organization of divisions, corps, and armies, all will be set forth in the scheme which will be submitted to you with the recommendation that it be transmitted for the consideration of Congress. . . .

The conduct of the American troops in France, their progressive development in military experience and ability, the fine staff work, and the modesty and gallantry of the individual soldier is a matter of pride to all Americans. General Pershing and his command have earned the thanks of the American people.

The work of General Tasker H. Bliss as military representative of the War Department with the American Section of the Supreme War Council at Versailles has been of the greatest value to the War Department.

I can not close this report without making of record the appreciation of the War Department of the work of the many trained and patriotic officers of the army whom the destiny of war did not call to France. These officers, forced to remain behind in the United States by the imperative necessity of having trained men to keep the

machine moving, have kept up their work with such intelligence, zeal, and devotion to duty as to show a high order of patriotism. The officers and men who have not been able on account of the armistice to be transported to France deserve also, with their comrades in France, the thanks of the Amercian people.

CHAPTER IX

General Pershing's Own Story [1]

IMMEDIATELY upon receiving my orders I selected a small staff and proceeded to Europe in order to become familiar with conditions at the earliest possible moment.

The warmth of our reception in England and France was only equaled by the readiness of the commanders-in-chief of the veteran armies of the Allies and their staffs to place their experience at our disposal. In consultation with them the most effective means of cooperation of effort was considered. With French and British armies at their maximum strength, and all efforts to dispossess the enemy from his firmly intrenched positions in Belgium and France having failed, it was necessary to plan for an American force adequate to

THE AMERICAN COMMANDER-IN-CHIEF IN THE FIELD

Photograph of General John J. Pershing just after he had been decorated with the Star and Ribbon of the Legion of Honor of France, the highest decoration ever awarded an American soldier. General Pershing was raised to a full generalship soon after his arrival in France, an honor which has previously been held only by Washington, Grant, Sherman and Sheridan, but which he now shares with Generals Bliss and March.

turn the scale in favor of the Allies. Taking account of the strength of the central powers at that time, the immensity of the problem which confronted us could hardly be overestimated. The first requisite being an organization that could give intelligent direction to effort, the formation of a General Staff occupied my early attention.

GENERAL STAFF

A well-organized General Staff through which the commander exercises his functions is essential to a successful modern army. However capable our division, our battalion, and our companies as such, success would be impossible without thoroughly co-ordinated endeavor. A General Staff broadly organized and trained for war had not hitherto existed in our army. Under the Commander-in-Chief, this staff must carry out the policy and direct the details of administration, supply, preparation, and operations of the army as a whole, with all special branches and bureaus subject to its control. As models to aid us we had the

veteran French General Staff and the experience of the British who had similarly formed an organization to meet the demands of a great army. By selecting from each the features best adapted to our basic organization, and fortified by our own early experience in the war, the development of our great General Staff system was completed.

The General Staff is naturally divided into five groups, each with its chief who is an assistant to the Chief of the General Staff. G. 1 is in charge of organization and equipment of troops, replacements, tonnage, priority of overseas shipment, the auxiliary welfare association and cognate subjects; G. 2 has censorship, enemy intelligence, gathering and disseminating information, preparation of maps, and all similar subjects; G. 3 is charged with all strategic studies and plans, movement of troops, and the supervision of combat operations; G. 4 coordinates important questions of supply, construction, transport arrangements for combat, and of the operations of the service of supply, and of hospitalization and the evac-

uation of the sick and wounded; G. 5 supervises the various schools and has general direction and coordination of education and training.

The first Chief of Staff was Col. (now Maj.-Gen.) James G. Harbord, who was succeeded in March, 1918, by Maj.-Gen. James W. McAndrew. To these officers, to the deputy chief of staff, and to the assistant chiefs of staff, who, as heads of sections, aided them, great credit is due for the results obtained not only in perfecting the General Staff organization but in applying correct principles to the multiplicity of problems that have arisen.

ORGANIZATION AND TRAINING

After a thorough consideration of allied organizations it was decided that our combat division should consist of four regiments of infantry of 3,000 men, with three battalions to regiment and four companies of 250 men each to a battalion, and of an artillery brigade of three regiments, a machine-gun battalion, an engineer regiment, a trench-mortar battery, a

signal battalion, wagon trains, and the headquarters staffs and military police. These with medical and other units, made a total of over 28,000 men, or practically double the size of a French or German division. Each corps would normally consist of six divisions—four combat and one depot and one replacement division—and also two regiments of cavalry, and each army of from three to five corps. With four divisions fully trained, a corps could take over an American sector with two divisions in line and two in reserve, with the depot and replacement divisions prepared to fill the gaps in the ranks.

Our purpose was to prepare an integral American force, which should be able to take the offensive in every respect. Accordingly, the development of a self-reliant infantry by thorough drill in the use of the rifle and in the tactics of open warfare was always uppermost. The plan of training after arrival in France allowed a division one month for acclimatization and instruction in small units from bat-

talions down, a second month in quiet trench sectors by battalion, and a third month after it came out of the trenches when it should be trained as a complete division in war of movement. . . .

ARTILLERY, AIRPLANES, AND TANKS

Our entry into the war found us with few of the auxiliaries necessary for its conduct in the modern sense. Among our most important deficiencies in material were artillery, aviation, and tanks. In order to meet our requirements as rapidly as possible, we accepted the offer of the French Government to provide us with the necessary artillery equipment of seventy-fives, one fifty-five millimeter howitzers, and one fifty-five G P F guns from their own factories for thirty divisions. The wisdom of this course is fully demonstrated by the fact that, although we soon began the manufacture of these classes of guns at home, there were no guns of the calibers mentioned manufactured in America on our front at the date the armis-

tice was signed. The only guns of these types produced at home thus far received in France are 109 seventy-five millimeter guns.

In aviation we were in the same situation, and here again the French Government came to our aid until our own aviation program should be under way. We obtained from the French the necessary planes for training our personnel, and they have provided us with a total of 2,676 pursuit, observation, and bombing planes. The first airplanes received from home arrived in May, and altogether we have received 1,379. The first American squadron completely equipped by American production, including airplanes, crossed the German lines on August 7, 1918. As to tanks, we were also compelled to rely upon the French. Here, however, we were less fortunate, for the reason that the French production could barely meet the requirements of their own armies.

It should be fully realized that the French Government has always taken a most liberal attitude and has been most anxious to give us every possible assistance in meeting our defi-

ciencies in these as well as in other respects. Our dependence upon France for artillery, aviation, and tanks was, of course, due to the fact that our industries had not been exclusively devoted to military production. All credit is due our own manufacturers for their efforts to meet our requirements, as at the time the armistice was signed we were able to look forward to the early supply of practically all our necessities from our own factories.

The welfare of the troops touches my responsibility, as Commander-in-Chief, to the mothers and fathers and kindred of the men who came to France in the impressionable period of youth. They could not have the privilege accorded European soldiers during their periods of leave of visiting their families and renewing their home ties. Fully realizing that the standard of conduct that should be established for them must have a permanent influence in their lives and on the character of their future citizenship, the Red Cross, the Young Men's Christian Association, Knights of Columbus, the Salvation Army,

and the Jewish Welfare Board, as auxiliaries in this work, were encouraged in every possible way. The fact that our soldiers, in a land of different customs and language, have borne themselves in a manner in keeping with the cause for which they fought, is due not only to the efforts in their behalf but much more to other high ideals, their discipline, and their innate sense of self-respect. It should be recorded, however, that the members of these welfare societies have been untiring in their desire to be of real service to our officers and men. The patriotic devotion of these representative men and women has given a new significance to the Golden Rule, and we owe to them a debt of gratitude that can never be repaid.

COMBAT OPERATIONS

During our periods of training in the trenches some of our divisions had engaged the enemy in local combats, the most important of which was Seicheprey by the Twenty-sixth on April 20th, in the Toul sector, but none had

A LETTER FROM HOME

In thousands of France's little stone houses this scene has been duplicated. In the towns and villages soldiers were assigned or "billeted" to the houses of the inhabitants with the result that [illegible] mutual respect grew up between the two nationalities.

participated in action as a unit. The First Division, which had passed through the preliminary stages of training, had gone to the trenches for its first period of instruction at the end of October and by March 21st, when the German offensive in Picardy began, we had four divisions with experience in the trenches, all of which were equal to any demands of battle action. The crisis which this offensive developed was such that our occupation of an American sector must be postponed.

On March 28th I placed at the disposal of Marshal Foch, who had been agreed upon as Commander-in-Chief of the Allied armies, all of our forces to be used as he might decide. At his request the First division was transferred from the Toul sector to a position in reserve at Chaumont en Vexin. As German superiority in numbers required prompt action, an agreement was reached at the Abbeville conference of the Allied premiers and commanders and myself on May 2d by which British shipping was to transport ten American divisions to the British army area, where they

were to be trained and equipped, and additional British shipping was to be provided for as many divisions as possible for use elsewhere.

On April 26th the First Division had gone into line in the Montdidier salient on the Picardy battle front. Tactics had been suddenly revolutionized to those of open warfare, and our men, confident of the results of their training, were eager for the test. On the morning of May 28th this division attacked the commanding German position in its front, taking with splendid dash the town of Cantigny and all other objectives, which were organized and held steadfastly against vicious counter-attacks and galling artillery fire. Although local, this brilliant action had an electrical effect, as it demonstrated our fighting qualities under extreme battle conditions, and also that the enemy's troops were not altogether invincible.

The Germans' Aisne offensive, which began on May 27th, had advanced rapidly toward the River Marne and Paris, and the Allies faced a crisis equally as grave as that of the Picardy

offensive in March. Again every available man was placed at Marshal Foch's disposal, and the Third Division, which had just come from its preliminary training in the trenches, was hurried to the Marne. Its motorized machine-gun battalion preceded the other units and successfully held the bridge-head at the Marne, opposite Château-Thierry. The Second Division, in reserve near Montdidier, was sent by motor trucks and other available transport to check the progress of the enemy toward Paris. The division attacked and retook the town and railroad station at Bouresches and sturdily held its ground against the enemy's best guard divisions. In the battle of Belleau Wood, which followed, our men proved their superiority and gained a strong tactical position, with far greater loss to the enemy than to ourselves. On July 1st, before the Second was relieved, it captured the village of Vaux with most splendid precision.

Meanwhile our Second Corps, under Maj.-Gen. George W. Read, had been organized for the command of our divisions with the British,

which were held back in training areas or assigned to second-line defenses. Five of the ten divisions were withdrawn from the British area in June, three to relieve divisions in Lorraine and the Vosges and two to the Paris area to join the group of American divisions which stood between the city and any farther advance of the enemy in that direction.

The great June-July troop movement from the States was well under way, and, although these troops were to be given some preliminary training before being put into action, their very presence warranted the use of all the older divisions in the confidence that we did not lack reserves. Elements of the Forty-second Division were in the line east of Rheims against the German offensive of July 15th, and held their ground unflinchingly. On the right flank of this offensive four companies of the Twenty-eighth Division were in position in face of the advancing waves of the German infantry. The Third Division was holding the bank of the Marne from the bend east of the mouth of the Surmelin to the west

of Mézy, opposite Château-Thierry, where a large force of German infantry sought to force a passage under support of powerful artillery concentrations and under cover of smoke screens. A single regiment of the Third wrote one of the most brilliant pages in our military annals on this occasion. It prevented the crossing at certain points on its front while, on either fiank, the Germans, who had gained a footing, pressed forward. Our men, firing in three directions, met the German attacks with counter-attacks at critical points and succeeded in throwing two German divisions into complete confusion, capturing 600 prisoners.

The great force of the German Château-Thierry offensive established the deep Marne salient, but the enemy was taking chances, and the vulnerability of this pocket to attack might be turned to his advantage. Seizing this opportunity to support my conviction, every division with any sort of training was made available for use in a counter-offensive. The place of honor in the thrust toward Soissons on July 18th was given to our First and Sec-

ond divisions in company with chosen French divisions. Without the usual brief warning of a preliminary bombardment, the massed French and American artillery, firing by the map, laid down its rolling barrage at dawn while the infantry began its charge. The tactical handling of our troops under these trying conditions was excellent throughout the action. The enemy brought up large numbers of reserves and made a stubborn defense both with machine guns and artillery, but through five days' fighting the First Division continued to advance until it had gained the heights above Soissons and captured the village of Berzy-le-sec. The Second Division took Beau Repaire farm and Vierzy in a very rapid advance and reached a position in front of Tigny at the end of its second day. These two divisions captured 7,000 prisoners and over 100 pieces of artillery.

The Twenty-sixth Division, which, with a French division, was under command of our First Corps, acted as a pivot of the movement toward Soissons. In the 18th it took the vil-

lage of Torcy while the Third Division was crossing the Marne in pursuit of the retiring enemy. The Twenty-sixth attacked again on the 21st, and the enemy withdrew past the Château-Thierry-Soissons road. The Third Division, continuing its progress, took the heights of Mont St. Père and the villages of Chartèves and Jaulgonne in the face of both machine-gun and artillery fire.

On the 24th, after the Germans had fallen back from Trugny and Epieds, our Forty-second Division, which had been brought over from the Champagne, relieved the Twenty-sixth and, fighting its way through the Forêt de Fère, overwhelmed the nest of machine guns in its path. By the 27th it had reached the Ourcq, whence the Third and Fourth divisions were already advancing, while the French divisions with which we were co-operating were moving forward at other points.

The Third Division had made its advance into Roncheres Wood on the 29th and was relieved for rest by a brigade of the Thirty-second. The Forty-second and Thirty-second

undertook the task of conquering the heights beyond Cierges, the Forty-second capturing Sergy and the Thirty-second capturing Hill 230, both American divisions joining in the pursuit of the enemy to the Vesle, and thus the operation of reducing the salient was finished. Meanwhile the Forty-second was relieved by the Fourth at Chéry-Chartreuve, and the Thirty-second by the Twenty-eighth, while the Seventy-seventh Division took up a position on the Vesle. The operations of these divisions on the Vesle were under the Third Corps, Maj.-Gen. Robert L. Bullard, commanding.

BATTLE OF ST. MIHIEL

With the reduction of the Marne salient we could look forward to the concentration of our divisions in our own zone. In view of the forthcoming operation against the St. Mihiel salient, which had long been planned as our first offensive action on a large scale, the First Army was organized on August 10th under my personal command. While American units had held different divisional and corps

sectors along the western front, there had not been up to this time, for obvious reasons, a distinct American sector; but, in view of the important parts the American forces were now to play, it was necessary to take over a permanent portion of the line. Accordingly, on August 30th, the line beginning at Port sur Seille, east of the Moselle and extending to the west through St. Mihiel, thence north to a point opposite Verdun, was placed under my command. The American sector was afterwards extended across the Meuse to the western edge of the Argonne Forest, and included the Second Colonial French, which held the point of the salient, and the Seventeenth French Corps, which occupied the heights above Verdun.

The preparation for a complicated operation against the formidable defenses in front of us included the assembling of divisions and of corps and army artillery, transport, aircraft, tanks, ambulances, the location of hospitals, and the molding together of all of the elements of a great modern army with its own railroads,

supplied directly by our own Service of Supply. The concentration for this operation, which was to be a surprise, involved the movement, mostly at night, of approximately 600,000 troops, and required for its success the most careful attention to every detail.

The French were generous in giving us assistance in corps and army artillery, with its personnel, and we were confident from the start of our superiority over the enemy in guns of all calibres. Our heavy guns were able to reach Metz and to interfere seriously with German rail movements. The French Independent Air Force was placed under my command which, together with the British bombing squadrons and our air forces, gave us the largest assembly of aviation that had ever been engaged in one operation on the western front.

From Les Eparges around the nose of the salient at St. Mihiel to the Moselle River the line was roughly forty miles long and situated on commanding ground greatly strengthened by artificial defenses. Our First corps (Eighty-second, Ninetieth, Fifth, and Second

divisions) under command of Major-General Hunter Liggett, restrung its right on Pont-a-Mousson, with its left joining our Third Corps (the Eighty-ninth, Forty-second, and First divisions), under Major-General Joseph T. Dickman, in line to Xivray, were to swing in toward Vigneulles on the pivot of the Moselle River for the initial assault. From Xivray to Mouilly the Second Colonial French Corps was in line in the center and our Fifth Corps, under command of Major-General George H. Cameron, with our Twenty-sixth Division and a French division at the western base of the salient, were to attack three difficult hills—Les Eparges, Combres, and Amaramthe. Our First Corps had in reserve the Seventy-eighth Division, our Fourth Corps the Third Division, and our First Army the Thirty-fifth and Ninety-first divisions, with the Eightieth and Thirty-third available. It should be understood that our corps organizations are very elastic, and that we have at no time had permanent assignments of divisions to corps.

After four hours' artillery preparation, the seven American divisions in the front line advanced at 5 A. M., on September 12th, assisted by a limited number of tanks manned partly by Americans and partly by French. These divisions, accompanied by groups of wire cutters and others armed with bangalore torpedoes, went through the successive bands of barbed wire that protected the enemy's front line and support trenches, in irresistible waves on schedule time, breaking down all defenses of an enemy demoralized by the great volume of our artillery fire and our sudden approach out of the fog.

Our First Corps advanced to Thiaucourt, while our Fourth Corps curved back to the southwest through Nonsard. The Second Colonial French Corps made the slight advance required of it on very difficult ground, and the Fifth Corps took its three ridges and repulsed a counter-attack. A rapid march brought reserve regiments of a division of the Fifth Corps into Vigneulles in the early morning, where it linked up with patrols of our Fourth

Corps, closing the salient and forming a new line west of Thiaucourt to Vigneulles and beyond Fresnes-en-Woevre. At the cost of only 7,000 casualties, mostly light, we had taken 16,000 prisoners and 443 guns, a great quantity of material, released the inhabitants of many villages from enemy domination and established our lines in a position to threaten Metz. This signal success of the American First Army in its first offensive was of prime importance. The Allies found they had a formidable army to aid them, and the enemy learned finally that he had one to reckon with.

MEUSE-ARGONNE OFFENSIVE, FIRST PHASE

On the day after we had taken the St. Mihiel salient, much of our corps and army artillery which had operated at St. Mihiel, and our divisions in reserve at other points, were already on the move toward the area back of the line between the Meuse River and the western edge of the forest of Argonne. With the exception of St. Mihiel, the old German front line from Switzerland to the east of Rheims was still

intact. In the general attack all along the line, the operation assigned the American army as the hinge of this Allied offensive was directed toward the important railroad communications of the German armies through Méziéres and Sedan. The enemy must hold fast to this part of his lines or the withdrawal of his forces with four years' accumulation of plants and material would be dangerously imperiled.

The German army had as yet shown no demoralization and, while the mass of its troops had suffered in morale, its first-class divisions and notably its machine-gun defense were exhibiting remarkable tactical efficiency as well as courage. The German General Staff was fully aware of the consequences of a success on the Meuse-Argonne line. Certain that he would do everything in his power to oppose us, the action was planned with as much secrecy as possible and was undertaken with the determination to use all our divisions in forcing decision. We expected to draw the best German divisions to our front and to consume

them while the enemy was held under grave apprehension lest our attack should break his line, which it was our firm purpose to do. . . .

Our right flank was protected by the Meuse, while our left embraced the Argonne Forest whose ravines, hills, and elaborate defense screened by dense thickets had been generally considered impregnable. Our order of battle from right to left was the Third Corps from the Meuse to Malancourt, with the Thirty-third, Eightieth, and Fourth divisions in line, and the Third Division as corps reserve; the Fifth Corps from Malancourt to Vauquois, with Seventy-ninth, Eighty-seventh, and Ninety-first divisions in line, and the Thirty-second in corps reserve; and the First Corps, from Vauquois to Vienne le Château, with Thirty-fifth, Twenty-eighth, and Seventy-seventh divisions in line, and the Ninety-second in corps reserve. The army reserve consisted of the First, Twenty-ninth, and Eighty-second divisions.

On the night of September 25th our troops quietly took the place of the French who thinly

held the line in this sector which had long been inactive. In the attack which began on the 26th we drove through the barbed wire entanglements and the sea of shell craters across No Man's Land, mastering the first-line defenses. Continuing on the 27th and 28th, against machine guns and artillery of an increasing number of enemy reserve divisions, we penetrated to a depth of from three to seven miles, and took the village of Montfaucon and its commanding hill and Exermont, Gercourt, Cuisy, Septsarges, Malancourt, Ivoiry, Epinonville, Charpentry, Very, and other villages. East of the Meuse one of our divisions, which was with the Second Colonial French Corps, captured Marcheville, and Rieville, giving further protection to the flank of our main body. We had taken 10,000 prisoners, we had gained our point of forcing the battle into the open and were prepared for the enemy's reaction, which was bound to come as he had good roads and ample railroad facilities for bringing up his artillery and reserves.

In the chill rain of dark nights our engineers

had to build new roads across spongy, shell-torn areas, repair broken roads beyond No Man's Land, and build bridges. Our gunners, with no thought of sleep, put their shoulders to wheels and dragropes to bring their guns through the mire in support of the infantry, now under the increasing fire of the enemy's artillery. Our attack had taken the enemy by surprise, but, quickly recovering himself, he began to fire counter-attacks in strong forces, supported by heavy bombardments, with large quantities of gas. From September 28th until October 4th we maintained the offensive against patches of woods defended by snipers and continuous lines of machine guns, and pushed forward our guns and transport, seizing strategical points in preparation for further attacks.

OTHER UNITS WITH ALLIES

Other divisions attached to the Allied armies were doing their part. It was the fortune of our Second Corps, composed of the Twenty-seventh and Thirtieth divisions, which had re-

mained with the British, to have a place of honor in co-operation with the Australian Corps, on September 29th and October 1st, in the assault on the Hindenburg line where the St. Quentin Canal passes through a tunnel under a ridge. The Thirtieth Division speedily broke through the main line of defense for all its objectives, while the Twenty-seventh pushed on impetuously through the main line until some of its elements reached Gouy. In the midst of the maze of trenches and shell craters and under cross-fire from machine guns the other elements fought desperately against odds. In this and in later actions, from October 6th to October 19th, our Second Corps captured over 6,000 prisoners and advanced over thirteen miles. The spirit and aggressiveness of these divisions have been highly praised by the British army commander under whom they served.

On October 2d to 9th our Second and Thirty-sixth divisions were sent to assist the French in an important attack against the old German positions before Rheims. The Second con-

quered the complicated defense works on their front against a persistent defense worthy of the grimmest period of trench warfare and attacked the strongly held wooded hill of Blanc Mont, which they captured in a second assault, sweeping over it with consummate dash and skill. This division then repulsed strong counter-attacks before the village and cemetery of Ste. Etienne and took the town, forcing the Germans to fall back from before Rheims and yield positions they had held since September, 1914. On October 9th the Thirty-sixth Division relieved the Second and, in its first experience under fire, withstood very severe artillery bombardment and rapidly took up the pursuit of the enemy, now retiring behind the Aisne.

MEUSE-ARGONNE OFFENSIVE, SECOND PHASE

The Allied progress elsewhere cheered the efforts of our men in this crucial contest as the German command threw in more and more first-class troops to stop our advance. We made steady headway in the almost impene-

trable and strongly held Argonne Forest, for, despite this reinforcement, it was our army that was doing the driving. Our aircraft was increasing in skill and numbers and forcing the issue, and our infantry and artillery were improving rapidly with each new experience. The replacements fresh from home were put into exhausted divisions with little time for training, but they had the advantage of serving beside men who knew their business and who had almost become veterans over night. The enemy had taken every advantage of the terrain, which especially favored the defense, by a prodigal use of machine guns manned by highly-trained veterans and by using his artillery at short ranges. In the face of such strong frontal positions we should have been unable to accomplish any progress according to previously accepted standards, but I had every confidence in our aggressive tactics and the courage of our troops.

On October 4th the attack was renewed all along our front. The Third Corps tilting to the left followed the Brieulles-Cunel road; our

Fifth Corps took Gesnes while the First Corps advanced for over two miles along the irregular valley of the Aire River and in the wooded hills of the Argonne that bordered the river, used by the enemy with all his art and weapons of defense. This sort of fighting continued against an enemy striving to hold every foot of ground and whose very strong counter-attacks challenged us at every point. On the 7th the First Corps captured Chatel-Chéhéry and continued along the river to Cornay. On the east of Meuse sector one of the two divisions co-operating with the French captured Consenvoye and the Haumont Woods. On the 9th the Fifth Corps, in its progress up the Aire, took Fléville, and the Third Corps, which had continuous fighting against odds, was working its way through Brieulless and Cunel. On the 10th we had cleared the Argonne Forest of the enemy.

It was now necessary to constitute a second army, and on October 9th the immediate command of the First Army was turned over to Lieutenant-General Hunter Liggett. The

command of the Second Army, whose divisions occupied a sector in the Woevre, was given to Lieutenant-General Robert L. Bullard, who had been commander of the First Division and then of the Third Corps. Major-General Dickman was transferred to the command of the First Corps, while the Fifth Corps was placed under Major-General Charles P. Summerall, who had recently commanded the First Division. Major-General John L. Hines, who had gone rapidly up from regimental to division commander, was assigned to the Third Corps. These four officers had been in France from the early days of the expedition and had learned their lessons in the school of practical warfare.

Our constant pressure against the enemy brought day by day more prisoners, mostly survivors from machine-gun nests captured in fighting at close quarters. On October 18th there was very fierce fighting in the Caures Woods east of the Meuse and in the Ormont Woods. On the 14th the First Corps took St. Juvin, and the Fifth Corps, in hand-to-hand

encounters, entered the formidable Kriemhilde line, where the enemy had hoped to check us indefinitely. Later the Fifth Corps penetrated further the Kriemhilde line, and the First Corps took Champigneulles and the important town of Grandpre. Our dogged offensive was wearing down the enemy, who continued desperately to throw his best troops against us, thus weakening his line in front of our Allies and making their advance less difficult.

DIVISIONS IN BELGIUM

Meanwhile we were not only able to continue the battle, but our Thirty-seventh and Ninety-first divisions were hastily withdrawn from our front and dispatched to help the French army in Belgium. Detraining in the neighborhood of Ypres, these divisions advanced by rapid stages to the fighting line and were assigned to adjacent French corps. On October 31st, in continuation of the Flanders offensive, they attacked and methodically broke down all enemy resistance. On November 3d the Thirty-seventh had completed its mission in dividing

the enemy across the Escaut River and firmly established itself along the east bank included in the division zone of action. By a clever flanking movement troops of the Ninety-first Division captured Spitaals Bosschen, a difficult wood extending across the central part of the division sector, reached the Escaut, and penetrated into the town of Audenarde. These divisions received high commendation from their corps commanders for their dash and energy.

MEUSE-ARGONNE—LAST PHASE

On the 23d the Third and Fifth corps pushed northward to the level of Bantheville. While we continued to press forward and throw back the enemy's violent counter-attacks with great loss to him, a regrouping of our forces was under way for the final assault. Evidences of loss of morale by the enemy gave our men more confidence in attack and more fortitude in enduring the fatigue of incessant effort and the hardships of very inclement weather.

With comparatively well-rested divisions, the

final advance in the Meuse-Argonne front was begun on November 1st. Our increased artillery force acquitted itself magnificently in support of the advance, and the enemy broke before the determined infantry, which, by its persistent fighting of the past weeks and the dash of this attack, had overcome his will to resist. The Third Corps took Aincreville, Doulcon, and Andevanne, and the Fifth Corps took Landres et St. Georges and pressed through successive lines of resistance to Bayonville and Chennery. On the 2d the First Corps joined in the movement, which now became an impetuous onslaught that could not be stayed.

On the 3d advance troops surged forward in pursuit, some by motor trucks, while the artillery pressed along the country roads close behind. The First Corps reached Authe and Châtillon-Sur-Bar, the Fifth Corps, Fosse and Nouart, and the Third Corps Halles, penetrating the enemy's line to a depth of twelve miles. Our large caliber guns had advanced and were skilfully brought into position to fire upon the important lines at Montmedy, Longu-

yon, and Conflans. Our Third Corps crossed the Meuse on the 5th and the other corps, in the full confidence that the day was theirs, eagerly cleared the way of machine guns as they swept northward, maintaining complete coordination throughout. On the 6th, a division of the First Corps reached a point on the Meuse opposite Sedan, twenty-five miles from our line of departure. The strategical goal which was our highest hope was gained. We had cut the enemy's main line of communications, and nothing but surrender or an armistice could save his army from complete disaster.

In all forty enemy divisions had been used against us in the Meuse-Argonne battle. Between September 26th and November 6th we took 26,059 prisoners and 468 guns on this front. Our divisions engaged were the First, Second, Third, Fourth, Fifth, Twenty-sixth, Twenty-eighth, Twenty-ninth, Thirty-second, Thirty-third, Thirty-fifth, Thirty-seventh, Forty-second, Seventy-seventh, Seventy-eighth, Seventy-ninth, Eightieth, Eighty-second, Eighty-ninth, Ninetieth, and Ninety-first.

Many of our divisions remained in line for a length of time that required nerves of steel, while others were sent in again after only a few days' rest. The First, Fifth, Twenty-sixth, Forty-second, Seventy-seventh, Eightieth, Eighty-ninth, and Ninetieth were in the line twice. Although some of the divisions were fighting their first battle, they soon became equal to the best.

OPERATIONS EAST OF THE MEUSE

On the three days preceding November 10th, the Third, the Second Colonial, and the Seventeenth French corps fought a difficult struggle through the Meuse Hills south of Stenay and forced the enemy into the plain. Meanwhile, my plans for further use of the American forces contemplated an advance between the Meuse and the Moselle in the direction of Longwy by the First Army, while, at the same time, the Second Army should assure the offensive toward the rich coal fields of Briey. These operations were to be followed by an offensive toward Château-Salins east of the

Moselle, thus isolating Metz. Accordingly, attacks on the American front had been ordered and that of the Second Army was in progress on the morning of November 11th, when instructions were received that hostilities should cease at 11 o'clock A. M.

At this moment the line of the American sector, from right to left, began at Port-Sur-Seille, thence across the Moselle to Vandieres and through the Woevre to Bezonvaux in the foothills of the Meuse, thence along to the foothills and through the northern edge of the Woevre forests to the Meuse at Mouzay, thence along the Meuse connecting with the French under Sedan. . . .

STRENGTH

There are in Europe altogether including a regiment and some sanitary units with the Italian army and the organizations at Murmansk, also including those en route from the States, approximately 2,053,347 men, less our losses. Of this total there are in France 1,338,169 combatant troops. Forty divisions

have arrived, of which the infantry personnel of ten have been used as replacements, leaving thirty divisions now in France organized into three armies of three corps each.

The losses of the Americans up to November 18th are: Killed and wounded, 36,145; died of disease, 14,811; deaths unclassified, 2,204; wounded, 179,625; prisoners, 2,163; missing, 1,160. We have captured about 44,000 prisoners and 1,400 guns, howitzers and trench mortars. . . .

Finally, I pay the supreme tribute to our officers and soldiers of the line. When I think of their heroism, their patience under hardships, their unflinching spirit of offensive action, I am filled with emotion which I am unable to express. Their deeds are immortal, and they have earned the eternal gratitude of our country.

CHAPTER X

President Wilson's Review of the War

ON December 2, 1918, just prior to sailing for Europe to take part in the Peace Conference, President Wilson addressed Congress, reviewing the work of the American people, soldiers, sailors and civilians, in the World War which had been brought to a successful conclusion on November 11th. His speech, in part, follows:

"The year that has elapsed since I last stood before you to fulfil my constitutional duty to give to the Congress from time to time information on the state of the Union has been so crowded with great events, great processes and great results that I cannot hope to give you an adequate picture of its transactions or of the far-reaching changes which have been wrought in the life of our Nation and of the world. You have yourselves witnessed these things, as

I have. It is too soon to assess them; and we who stand in the midst of them and are part of them are less qualified than men of another generation will be to say what they mean or even what they have been. But some great outstanding facts are unmistakable and constitute in a sense part of the public business with which it is our duty to deal. To state them is to set the stage for the legislative and executive action which must grow out of them and which we have yet to shape and determine.

"A year ago we had sent 145,918 men overseas. Since then we have sent 1,950,513, an average of 162,542 each month, the number in fact rising in May last to 245,951, in June to 278,760, in July to 307,182 and continuing to reach similar figures in August and September —in August 289,570 and in September 257,438. No such movement of troops ever took place before, across 3,000 miles of sea, followed by adequate equipment and supplies, and carried safely through extraordinary dangers of attack, dangers which were alike strange and infinitely difficult to guard against. In all this

movement only 758 men were lost by enemy attacks, 630 of whom were upon a single English transport which was sunk near the Orkney Islands.

"I need not tell you what lay back of this great movement of men and material. It is not invidious to say that back of it lay a supporting organization of the industries of the country and of all its productive activities more complete, more thorough in method and effective in results, more spirited and unanimous in purpose and effort than any other belligerent had ever been able to effect. We profited greatly by the experience of the nations which had already been engaged for nearly three years in the exigent and exacting business, their every resource and every proficiency taxed to the utmost. We were the pupils. But we learned quickly and acted with a promptness and a readiness of co-operation that justify our great pride that we were able to serve the world with unparalleled energy and quick accomplishment.

"But it is not the physical scale and execu-

tive efficiency of preparation, supply, equipment and dispatch that I would dwell upon, but the mettle and quality of the officers and men we sent over and of the sailors who kept the seas, and the spirit of the Nation that stood behind them. No soldiers, or sailors, ever proved themselves more quickly ready for the test of battle or acquitted themselves with more splendid courage and achievement when put to the test. Those of us who played some part in directing the great processes by which the war was pushed irresistibly forward to the final triumph may now forget all that and delight our thoughts with the story of what our men did. Their officers understood the grim and exacting task they had undertaken and performed with audacity, efficiency and unhesitating courage that touch the story of convoy and battle with imperishable distinction at every turn, whether the enterprise were great or small—from their chiefs, Pershing and Sims, down to the youngest lieutenant; and their men were worthy of them—such men as hardly need to be commanded, and go to their terrible adventure

blithely and with the quick intelligence of those who know just what it is they would accomplish. I am proud to be the fellow-countryman of men of such stuff and valor. Those of us who stayed at home did our duty; the war could not have been won or the gallant men who fought it given their opportunity to win it otherwise; but for many a long day we shall think ourselves 'accursed we were not there, and hold our manhoods cheap while any speaks that fought' with these at St. Mihiel or Thierry. The memory of those days of triumphant battle will go with these fortunate men to their graves; and each will have his favorite memory. 'Old men forget; yet all shall be forgot, but he'll remember with advantages what feats he did that day!'

"What we all thank God for with deepest gratitude is that our men went in force into the line of battle just at the critical moment, when the whole fate of the world seemed to hang in the balance, and threw their fresh strength into the ranks of freedom in time to turn the whole tide and sweep of the fateful

struggle—turn it once for all, so that henceforth it was back, back, back for their enemies, always back, never again forward! After that it was only a scant four months before the commanders of the central empires knew themselves beaten, and now their very empires are in liquidation!

"And throughout it all how fine the spirit of the Nation was; what unity of purpose, what untiring zeal! What elevation of purpose ran through all its splendid display of strength, its untiring accomplishment. I have said that those of us who stayed at home to do the work of organization and supply will always wish that we had been with the men whom we sustained by our labor; but we can never be ashamed. It has been an inspiring thing to be here in the midst of fine men who had turned aside from every private interest of their own and devoted the whole of their trained capacity to the tasks that supplied the sinews of the whole great undertaking! The patriotism, the unselfishness, the thoroughgoing devotion and distinguished capacity that marked their toil-

some labors, day after day, month after month, have made them fit mates and comrades of the men in the trenches and on the sea. And not the men here in Washington only. They have but directed the vast achievement. Throughout innumerable factories, upon innumerable farms, in the depths of coal mines and iron mines and copper mines, wherever the stuffs of industry were to be obtained and prepared, in the shipyards, on the railways, at the docks, on the sea, in every labor that was needed to sustain the battle lines men have vied with each other to do their part and do it well. They can look any man-at-arms in the face, and say, we also strove to win and gave the best that was in us to make our fleets and armies sure of their triumph!

"And what shall we say of the women—of their instant intelligence, quickening every task that they touched; their capacity for organization and co-operation, which gave their action discipline and enhanced the effectiveness of everything they attempted; their aptitude at tasks to which they had never before set their

hands; their utter self-sacrificing alike in what they did and in what they gave? Their contribution to the great result is beyond appraisal. They have added a new luster to the annals of American womanhood.

"The least tribute we can pay to them is to make them the equals of men in political rights as they have proved themselves their equals in every field of practical work they have entered, whether for themselves or for their country. These great days of completed achievement would be sadly marred were we to omit that act of justice. Besides the immense practical services they have rendered, the women of the country have been the moving spirits in the systematic economies by which our people have voluntarily assisted to supply the suffering peoples of the world and the armies upon every front with food and everything else that we had that might serve the common cause. The details of such a story can never be fully written, but we carry them at our hearts and thank God that we can say we are the kinsmen of such.

"And now we are sure of the great triumph for which every sacrifice was made. It has come, come in its completeness, and with the pride and inspiration of these days of achievement quick within us we turn to the tasks of peace again—a peace secure against the violence of irresponsible monarchs and ambitious military coteries and made ready for a new order, for new foundations of justice and fair dealing.

"We are about to give order and organization to this peace, not only for ourselves, but for the other peoples of the world as well, so far as they will suffer us to serve them. It is international justice that we seek, not domestic safety merely. . . .

"So far as our domestic affairs are concerned the problem of our return to peace is a problem of economic and industrial readjustment. That problem is less serious for us than it may turn out to be for the nations which have suffered the disarrangements and the losses of war longer than we. Our people, moreover, do not wait to be coached and led. They know their

WOODROW WILSON

President of the United States during the whole course of the war and Commander-in-Chief of its army and navy. On November 11, 1918, he signalized the end of the war in a proclamation, in which he said: "My Fellow-Countrymen:—The armistice was signed this morning. Everything for which America fought has been accomplished."

own business, are quick and resourceful at every readjustment, definite in purpose and self-reliant in action. Any leading strings we might seek to put them in would speedily become hopelessly tangled because they would pay no attention to them and go their own way. All that we can do as their legislative and executive servants is to mediate the process of change here, there and elsewhere as we may. I have heard much counsel as to the plans that should be formed and personally conducted to a happy consummation, but from no quarter have I seen any general scheme of 'reconstruction' emerge which I thought it likely we could force our spirited businessmen and self-reliant laborers to accept with due pliancy and obedience.

"While the war lasted we set up many agencies by which to direct the industries of the country in the services it was necessary for them to render, by which to make sure of an abundant supply of the materials needed, by which to check undertakings that could for the time be dispensed with and stimulate those that

were most serviceable in war, by which to gain for the purchasing departments of the government a certain control over the prices of essential articles and materials, by which to restrain trade with alien enemies, make the most of the available shipping and systematize financial transactions, both public and private, so that there would be no unnecessary conflict or confusion—by which, in short, to put every material energy of the country in harness to draw the common load and make of us one team in accomplishment of a great task.

"But the moment we knew the armistice to have been signed we took the harness off. Raw materials upon which the government had kept its hand for fear there should not be enough for the industries that supplied the armies have been released, and put into the general market again. Great industrial plants whose whole output and machinery had been taken over for the uses of the government have been set free to return to the uses to which they were put before the war. It has not been possible to remove so readily or so quickly the control of

foodstuffs and of shipping, because the world has still to be fed from our granaries and the ships are still needed to send supplies to our men oversea and to bring the men back as fast as the disturbed conditions on the other side of the water permit; but even there restraints are being relaxed as much as possible, and more and more as the weeks go by.

"Never before have there been agencies in existence in this country which knew so much of the field of supply of labor, and of industry as the War Industries Board, the War Trade Board, the Labor Department, the Food Administration and the Fuel Administration have known since their labors became thoroughly systematized and they have not been isolated agencies; they have been directed by men which represented the permanent departments of the government and so have been the centers of unified and co-operative action. It has been the policy of the Executive, therefore, since the armistice was assured (which is in effect a complete submission of the enemy) to put the knowledge of these bodies at the disposal of the businessmen

of the country and to offer their intelligent mediation at every point and in every matter where it was desired. It is surprising how fast the process of return to a peace footing has moved in the three weeks since the fighting stopped. It promises to outrun any inquiry that may be instituted and any aid that may be offered. It will not be easy to direct it any better than it will direct itself. The American business man is of quick initiative. . . .

"I welcome this occasion to announce to the Congress my purpose to join in Paris the representatives of the governments with which we have been associated in the war against the Central Empires for the purpose of discussing with them the main features of the treaty of peace. I realize the great inconveniences that will attend my leaving the country, particularly at this time, but the conclusion that it was my paramount duty to go has been forced upon me by considerations which I hope will seem as conclusive to you as they have seemed to me.

"The Allied governments have accepted the bases of peace which I outlined to the Con-

gress on the 8th of January last, as the Central Empires also have, and very reasonably desire my personal counsel in their interpretation and application, and it is highly desirable that I should give it, in order that the sincere desire of our government to contribute without selfish purpose of any kind to settlements that will be of common benefit to all the nations concerned may be made fully manifest. The peace settlements which are now to be agreed upon are of transcendent importance both to us and to the rest of the world, and I know of no business or interest which should take precedence of them. The gallant men of our armed forces on land and sea have consciously fought for the ideals which they knew to be the ideals of their country; I have sought to express those ideals; they have accepted my statements of them as the substance of their own thought and purpose, as the associated governments have accepted them; I owe it to them to see to it, so far as in me lies, that no false or mistaken interpretation is put upon them, and no possible effort omitted to realize them. It is now my

duty to play my full part in making good what they offered their life's blood to obtain. I can think of no call to service which could transcend this. . . .

"May I not hope, gentlemen of the Congress, that in the delicate tasks I shall have to perform on the other side of the sea in my efforts truly and faithfully to interpret the principles and purposes of the country we love, I may have the encouragement and the added strength of your united support? I realize the magnitude and difficulty of the duty I am undertaking. I am poignantly aware of its grave responsibilities. I am the servant of the Nation. I can have no private thought or purpose of my own in performing such an errand. I go to give the best that is in me to the common settlements which I must now assist in arriving at in conference with the other working heads of the associated governments. I shall count upon your friendly countenance and encouragement. I shall not be inaccessible. The cables and the wireless will render me available for any counsel or service you

may desire of me, and I shall be happy in the thought that I am constantly in touch with the weighty matters of domestic policy with which we shall have to deal. I shall make my absence as brief as possible and shall hope to return with the happy assurance that it has been possible to translate into action the great ideals for which America has striven."

Speaking at the opening session of the peace conference in Paris on January 18, 1919, when he nominated Georges Clemenceau as permanent chairman, President Wilson paid this fine tribute to the war premier:

"Mr. Chairman: It gives me great pleasure to propose as permanent chairman of the conference, Mr. Clemenceau, the president of the Council.

"I would do this as a matter of custom. I would do this as a tribute to the French republic. But I wish to do it as something more than that. I wish to do it as a tribute to the man.

"France deserves the precedence not only because we are meeting at her capital and because she has undergone some of the most

tragical suffering of the war, but also because her capital, her ancient and beautiful capital, has so often been the center of conferences of this sort, on which the fortunes of large parts of the world turned.

"It is a very delightful thought that the history of the world which has so often centered here, will now be crowned by the achievements of this conference—because there is a sense in which this is the supreme conference of the history of mankind.

"More nations are represented here than were ever represented in such a conference before. The fortunes of all peoples are involved. A great war is ended which seemed about to bring a universal cataclysm. The danger is passed. A victory has been won for mankind, and it is delightful that we should be able to record these great results in this place.

"But it is more delightful to honor France because we can honor her in the person of so distinguished a servant. We have all felt in our participation in the struggles of this war the fine steadfastness which characterized the

WHEN IT WAS OVER "OVER THERE"

Victorious American troops arriving at New York after the signing of the armistice.

leadership of the French in the hands of Mr. Clemenceau. We have learned to admire him, and those of us who have been associated with him have acquired a genuine affection for him.

"Moreover those of us who have been in these recent days in constant consultation with him know how warmly his purpose is set towards the goal of achievement to which all our faces are turned. He feels as we feel, I have no doubt everybody in this room feels, that we are trusted to do a great thing, to do it in the highest spirit of friendship and accommodation, and to do it as promptly as possible in order that the hearts of men may have fear lifted from them and that they may return to those purposes of life which will bring them happiness and contentment and prosperity.

"Knowing his brotherhood of heart in these great matters, it affords me a personal pleasure to propose that Mr. Clemenceau shall be the permanent chairman of this cónference."

No record of the Great War would be complete without the inclusion of the splendid summing-up speech delivered by President Poin-

caré of the French Republic at the opening of the peace conference in January, 1919. It follows:

"Gentlemen: France greets and thanks you for having chosen as the seat of your labors the city which for more than four years the enemy has made his principal military objective and which the valor of the Allied armies has victoriously defended against unceasingly renewed offensives.

"Permit me to see in your decision the homage of all the nations that you represent toward a country which more than any other has endured the sufferings of war, of which entire provinces have been transformed into a vast battlefield, and have been systematically laid waste by the invader, and which has paid the human tribute in death.

"France has borne these enormous sacrifices although she had not the slightest responsibility for the frightful catastrophe which has overwhelmed the universe. And at the moment when the cycle of horror is ending, all the powers whose delegates are assembled here may

acquit themselves of any share in the crime which has resulted in so unprecedented a disaster. What gives you the authority to establish a peace of justice is the fact that none of the peoples of whom you are the delegates has had any part in the injustice. Humanity can place confidence in you because you are not among those who have outraged the rights of humanity.

"There is no need of further information or for special inquiries into the origin of the drama which has just shaken the world. The truth, bathed in blood, has already escaped from the imperial archives. The premeditated character of the trap is today clearly proved.

"In the hope of conquering first the hegemony of Europe and next the mastery of the world, the central empires, bound together by a secret plot, found the most abominable of pretexts for trying to crush Serbia and force their way to the east. At the same time they disowned the most solemn undertakings in order to crush Belgium and force their way into the heart of France.

"These are the two unforgettable outrages which opened the way to aggression. The combined efforts of Great Britain, France and Russia were exerted against that man-made arrogance.

"If after long vicissitudes those who wished to reign by the sword have perished by the sword, they have only themselves to blame. They have been destroyed by their own blindness.

"What could be more significant than the shameful bargains they attempted to offer to Great Britain and France at the end of July, 1914, when to Great Britain they suggested: 'Allow us to attack France on land and we will not enter the Channel,' and when they instructed their Ambassador to say to France: 'We will only accept a declaration of neutrality on your part if you surrender to us Briey, Toul and Verdun.' It is in the light of these things, gentlemen, that all the conclusions you will have to draw from the war will take shape.

"Your nations entered the war successively,

but came one and all to the help of threatened right. Like Germany, Great Britain had guaranteed the independence of Belgium. Germany sought to crush Belgium, Great Britain and France both swore to save her.

"Thus, from the very beginning of hostilities there came into conflict the two ideas which for fifty months were to struggle for the dominion of the world—the idea of sovereign force, which accepts neither control nor check, and the idea of justice, which depends on the sword only to prevent or repress the abuse of strength.

"Faithfully supported by her dominions and her colonies, Great Britain decided that she could not remain aloof from a struggle in which the fate of every country was involved. She has made, and her dominions and colonies have made with her, prodigious efforts to prevent the war from ending in the triumph of the spirit of conquest and the destruction of right.

"Japan, in her turn, only decided to take up arms out of loyalty to Great Britain, her great ally, and from the consciousness of the danger

in which both Asia and Europe would have stood of the hegemony of which the Germanic empires dreamed.

"Italy, who from the first had refused to lend a helping hand to German ambition, arose against an agelong foe only to answer the call of oppressed populations and to destroy at the cost of her blood the artificial political combination which took no account of human liberty.

"Rumania resolved to fight only to realize that national unity which was opposed by the same powers of arbitrary force. Abandoned, betrayed and strangled, she had to submit to an abominable treaty, the revision of which you will exact.

"Greece, whom the enemy for many months tried to turn from her traditions and destinies, raised an army only to escape attempts at domination of which she felt the growing threat.

"Portugal, China and Siam abandoned neutrality only to escape the strangling pressure of the Central Powers.

"Thus, it was the extent of German ambi-

tions that brought so many peoples, great and small, to align themselves against the same adversary. And what shall I say of the solemn resolutions taken by the United States in the spring of 1917, under the auspices of its illustrious President, Mr. Wilson, whom I am happy to greet here in the name of grateful France and, if you will allow me to say so, gentlemen, in the name of all the nations represented in this room.

"What shall I say of the many other American powers which either declared themselves against Germany—Brazil, Cuba, Panama, Guatemala, Nicaragua, Haiti, Honduras—or at least broke off diplomatic relations—Bolivia, Peru, Ecuador, Uruguay. From the north to the south the New World arose with indignation when it saw the empires of Central Europe, after having let loose the war without provocation and without excuse, carry it on with fire, pillage and the massacre of inoffensive beings.

"The intervention of the United States was something more, something greater than a

great political and military event. It was a supreme judgment passed at the bar of history by the lofty conscience of a free people and their chief magistrate on the enormous responsibilities incurred in the frightful conflict which was lacerating humanity.

"It was not only to protect itself from the audacious aims of German megalomania that the United States equipped fleets and created immense armies, but also, and above all, to defend an ideal of liberty over which it saw the huge shadow of the imperial eagle encroaching further every day. America, the daughter of Europe, crossed the ocean to rescue her mother from the humiliation of thraldom and to save civilization.

"The American people wished to put an end to the greatest scandal that has ever sullied the annals of mankind. Autocratic governments, having prepared in the secrecy of the chancelleries and the general staffs a mad programme of universal dominion, let loose their packs at the time fixed by their genius for intrigue and sounded the horns for the chase, or-

dering science (at the very time it was beginning to abolish distances, to bring men closer together and make life sweeter) to leave the bright sky toward which it was soaring and to place itself submissively at the service of violence, debasing the religious idea to the extent of making God the complacent auxiliary of their passions and the accomplice of their crimes—in short, counting as naught the traditions and wills of peoples, the lives of citizens, the honor of women and all those principles of public and private morality which we for our part have endeavored to keep unaltered throughout the war and which neither nations nor individuals can repudiate or disregard with impunity.

"While the conflict was gradually extending over the entire surface of the earth, the clanking of chains was heard here and there and captive nationalities from the depths of their age-long jails cried out to us for help. Yes, more, they escaped to come to our aid.

"Poland came to life again and sent us troops. The Czecho-Slovaks won their right

to independence in Siberia, in France and in Malay. The Jugo-Slavs, the Armenians, the Syrians and Levantines, the Arabs, all the victims, long helpless or resigned, of the historic deeds of injustice; all the martyrs of the past; all the outraged in conscience, all the strangled in liberty, viewed the clash of arms and turned to us as their natural defenders.

"The war gradually attained the fulness of its first significance and became in the full sense of the term a crusade of humanity for right, and if anything can console us, in part at least, for the losses we have suffered, it is assuredly the thought that our victory also is the victory of right. This victory is complete, for the enemy only asked for the armistice to escape from an irretrievable military disaster.

"In the interest of justice and peace, it now rests with you to reap from this victory its full fruits. In order to carry out this immense task you have decided to admit at first only the Allied or associated Powers and insofar as their interests are involved in the debates, the nations which remained neutral. You have

thought that terms of peace ought to be settled among ourselves before they are communicated to those against whom we have fought the good fight. The solidarity which has united us during the war and has enabled us to win military success ought to remain unimpaired during the negotiations for and after the signing of the treaty.

"It is not only the governments but free peoples who are represented here. To the test of danger they have learned to know and help one another. They want their intimacy of yesterday to assure the peace of tomorrow.

"Vainly would our enemies seek to divide us. If they have not yet renounced their customary maneuvers, they will soon find that they are meeting today, as during the hostilities, a homogeneous block which nothing will be able to disintegrate. Even before the armistice you reached that necessary unity under the aid of the lofty moral and political truths of which President Wilson has nobly made himself the interpreter, and in the light of these truths you intend to accomplish your mission.

"You will, therefore, seek nothing but justice, justice that has no favorites, justice in territorial problems, justice in financial problems, justice in economic problems. But justice is not inert, it does not submit to injustice. What it demands first when it has been violated, are restitution and reparation, for the peoples and individuals who have been despoiled or maltreated. In formulating this lawful claim it obeys neither hatred nor an instinctive or thoughtless desire for reprisals. It pursues a two-fold object—to render to each his due and not to encourage crime through leaving it unpunished.

"What justice also demands, inspired by the same feeling, is the punishment of the guilty and effective guarantees against an active return of the spirit by which they are prompted, and it is logical to demand that these guarantees should be given, above all, to the nations that have been and might again be most exposed to aggression or threat, to those who have many times stood in danger of being submerged by the periodic tide of the same invasion.

"What justice banishes is the dream of conquest and imperialism, contempt for national will, the arbitrary exchange of provinces between states, as though peoples were but articles of furniture or pawns in a game. The time is no more when diplomatists could meet to redraw with authority the map of the empires on the corner of a table. If you are to remake the map of the world it is in the name of the peoples, and one condition is that you shall faithfully interpret their thoughts and respect the right of nations, small and great, to dispose of themselves and to reconcile with this the equally sacred right of ethnical and religious minorities—a formidable task which science and history, your two advisers, will contribute to assist and facilitate.

"You will naturally strive to secure the material and moral means of subsistence for all those people who are constituted or reconstituted into States, for those who wish to unite themselves to their neighbors, for those who divide themselves into separate units, for those who reorganized themselves, for those who

divide themselves according to their regained traditions and, lastly, for all those whose freedom you have already sanctioned or are about to sanction. You will not call them into existence only to sentence them to death immediately because you would like your work in this, as in all other matters, to be fruitful and lasting.

"While introducing into the world as much harmony as possible you will, in conformity with the fourteenth of the propositions unanimously adopted by the great Allied Powers, establish a general League of Nations which will be the supreme guarantee against any fresh assault upon the right of peoples.

"You do not intend this international association to be directed against anybody in the future. It will not, of a set purpose, shut out anybody, but having been organized by the nations that have sacrificed themselves in the defense of right, it will receive from them its statutes and fundamental rules.

"It will lay down conditions concerning present or future adherence, and, as it is to have for

its essential aim the prevention as far as possible of the renewals of wars, it will, above all, seek to gain respect for the peace which you will have established and will find it the less difficult to maintain in proportion as this peace will in itself imply the greater realities of justice and safer guarantees of stability.

"By establishing this new order of things you will meet the aspirations of humanity, which, after the frightful convulsions of the blood-stained years, ardently wishes to feel itself protected by a union of free people against the every possible revival of primitive savagery. An immortal glory will attach to the names of the nations and the men who have desired to cooperate in this grand work in faith and brotherhood and who have taken the pains to eliminate from the future peace causes of disturbance and instability.

"This very day forty-eight years ago—on the 18th of January, 1871—the German Empire was proclaimed by an army of invasion in the chateau at Versailles. It was consecrated by the theft of two French provinces. It was

thus a violation from its origin, and, by the fault of its founders, it was born in injustice. It has ended in oblivion.

"You are assembled in order to repair the evil that has been done and to prevent a recurrence of it. You hold in your hands the future of the world. I leave you, gentlemen, to your grave deliberations and declare the conference of Paris open."

CHRONOLOGY OF AMERICAN OPERATIONS IN FRANCE

The following chronology of the major operations of the American Expeditionary Forces in France from April 28 to November 11, 1918, was prepared by General March and was included in his report to the Secretary of War:

April 28–29, 1918—A sector in the vicinity of Breteuil, northwest of Montdidier, was occupied by the First Division.

May 28—Cantigny was captured by the First Division. A detachment of our troops, reinforced by French artillery, successfully attacked the enemy on a front of about 2,200 yards. We occupied Cantigny, captured some 200 prisoners, and inflicted severe losses on the enemy.

June 10—The Second Division attacked in Bois de Belleau, advancing the line 900 yards on a front of 1½ miles, capturing 300 prisoners, 30 machine guns, 4 trench mortars, and stores of small arms, ammunition, and equipment. Held all of Hill 204 down to the village on the northeast slope, thus preventing the enemy from concentrating his forces in the northern part of Chateau-Thierry.

June 11—The Second Division continued its advance in the Bois de Belleau, capturing more prisoners and machine guns and two 77 mm. fieldpieces.

Our aviators executed their first bombing raid, dropping numerous bombs on the railway station at Dommary-Baroncourt, northwest of Metz. All of our planes returned in safety.

The artillery of the Second Division shelled the enemy in their areas, preventing concentration near Torcy, Monthiérs, Hill 128, and La Gonetrie farm. It discovered and dispersed a group of 210 machine guns in the wood south of Etrepilly. The Second Division captured the last of the German positions in the Bois de Belleau, taking 50 prisoners, machine guns, and trench mortars.

July 18—French and American troops advanced under the cover of a heavy storm on the front between Soissons and Château-Thierry. The greatest advance was in the northern part of the sector, where a depth of 5 miles was attained, and we reached the heights southwest of Soissons, dominating the railroad and highways.

July 24—The advance of theFranco-American forces continued, and in the evening the line ran east of Buzancy to Tigny, to Hartennes, Grand Rozoy, Ouichy-le-Château, Armentières, Coincy, Courpoil, and then joined the old line at Jaulgonne. West of Rheims Marfaux was retaken and the line ran from Aubilly, through Mézy, and joined the old line at Coulommes.

July 25—The line ran from the Ourcq to the Marne, where the allied troops advanced 6 kms. in the center

and 3 to 4 kms. on the flanks. The line in the evening ran from Armentières to Bruyéres, the eastern edge of the Bois de la Tourmelle, the eastern edge of Beuvardes, the eastern edge of le Charnel, the cross roads at Gros Chêne, la Boulangére, the northern edge of Treloup, Chassins.

July 26—The line ran: Nanteuil, Notre Dames, Hill 123, Hill 118, la Misére, Hill 100, southwestern part of Bois de la Tournelle, Hill 111, le Charnel. Hard fighting continued all day and the French and Americans steadily advanced on Fére.

July 27—The Forty-second Division tried to cross the Ourcq, but was driven back by heavy artillery fire.

July 28—The Forty-second Division renewed the assault, crossed the river, and after vigorous fighting took Seringes-et-Nesles, Nesles, and Sergy.

The Twenty-eighth Division held the line about 1 kilometer north of the Ourcq. During the day slow progress was made, the enemy slowly falling back after bitter rearguard action.

July 29—Franco-American troops advanced 3 kilometers from Oulchy to Villers Agron and Bougneux, Saponay, Seringes, Nesles, and Cierges, were included within our lines.

July 30—Our pressure continued on the right bank of the Ourcq. The railroad station at Fére and Cayenne farm remained in our possession, We lost Seringes-et-Nesles but re-occupied Sergy, Hill 312, and the woods 8 kilometers north of Ronchères.

July 31—The Twenty-eighth Division retook Seringes-

et-Nesles. The Thirty-second Division attacked in Crimpettes Woods with success; the woods were taken, and troops advanced to Cierges. German counter-attacks were brilliantly repulsed with the bayonet, and an immense amount of material and equipment was taken from the enemy.

August 3—After continuous fighting late in the evening Soissons was taken, and a line extending along the Vesle to between Braisne and Bazoches was being consolidated. South of the Aisne our troops drove back the enemy rear guard. Acting with the Fourth Division, the Thirty-second Division reached a line from Ville Savoye to a point just north of St. Gilles.

August 4—A large enemy patrol attacked in the vicinity of Coulees but was driven off by a combat group of the Fifth Division, which had been reenforced. Our troops were very active in patrolling, having sent out over seven reconnaissance, combat, and ambush patrols.

The Thirty-second Division took Fismes. In an eight-day battle this division forced the passage of the Ourcq, took prisoners from six enemy divisions, met, routed, and decimated a crack division of the Prussian Guards, a Bavarian division, and one other enemy division, and drove the enemy line back for 16 kilometers.

August 6—The Twenty-eighth Division launched an attack the objective of which was the north bank of the Vesle. The attack was met by excedingly heavy machine-gun and artillery fire. On the right our troops succeeded in crossing the river and advancing

to the highway which runs from Rheims to Soissons. On the left the advance was held up by the enemy's fire.

August 7—The units on the left advanced across the river and occupied the railroad lines on the north bank. The casualties resulting from this operation were considerable. A violent enemy counterattack was completely repulsed, and a number of prisoners and machine guns were left in our hands.

August 8—As a result of successful operations on the evening of August 8, 11 companies of infantry and some machine-gun detachments of the Twenty-eighth Division reached the north bank of the Vesle.

August 10—The Twenty-eighth Division launched an attack in Fismette. A creeping barrage moved ahead of them. They made some progress, but were soon exposed to flanking fire from both the east and the west and were forced to fall back into Fismette. The position here was very difficult. Flanking machine-gun fire came from both sides and heavy casualties were reported. A box barrage was placed around the town and ammunition was sent up. The town was held by one battalion, with one machine-gun platoon, which received orders to hold the position at all cost.

August 17—After strong artillery preparation the infantry of the Fifth Division captured the village of Frapelle and consolidated the lines north of the road running into the town from the southeast.

August 19—The enemy continued shelling Frapelle po-

sitions and the artillery of the Fifth Division replied actively.

August 21—The Fifth Division repulsed hostile attack with heavy loss to the enemy and with no casualties to ourselves.

The Thirty-second Division acting with the Tenth French Army advanced to and held Juvigny.

The Seventy-seventh Division cleared the small wood between the Vesle and the railroad west of Château du Diable.

September 3—During the five days prior to September 3 the Thirty-second Division made daily advances against the enemy, gaining 6 kilometers through the very difficult terrain and against violent opposition. It captured 11 officers and 920 enlisted men. A large amount of guns and munitions were captured. A patrol of the Seventy-seventh Division penetrated to Bazoches.

September 5—French and American units advanced in the Oise-Rheims area as far as Condé. Strong patrols of the Seventy-seventh Division were pushed forward north of the Vesle and were encountered by machine-gun resistance. Our casualties were slight.

The Twenty-eighth Division crossed the Vesle in force and pursued the enemy to the north.

September 6—The artillery of the Twenty-eighth Division directed harassing and destructive fire on the Aisne bridges, while the enemy harassed the villages in our rear areas, using a great number of gas shells.

September 7—The Twenty-eighth Division repulsed two enemy counterattacks. The Seventy-seventh Division drove the enemy out of La Cendiere Farm and have passed the Aisne Canal.

September 12—After four hours' bombardment our troops advanced on the south and west flanks of the St. Mihiel salient at 5 A. M. By 7.30 A. M. the forces operating on the south had reached the southern edge of the Bois Juli, the Quart de Réserve, and the northern edge of the Bois de Mort Mare. By noon they had reached Essey and Vieville and the army operating in the difficult ground in the west had captured Les Eparges. At 6 P. M. the troops had reached a point 1 kilometer east of Senzey and had taken St. Remy and Combres. During the night the troops on the western flank of the salient advanced 5 miles in five hours, reaching Vigneulles by 3 A. M.

September 14—There was general advance along the entire line, and the American Army established itself on the following front: Manheulles, Fresnes, Pintheville, St. Hilaire, Doncourt, northeast of Woel, south end of the Etang de Lachaussée, Vandieres, and across the Moselle at Champey.

September 17—American troops advanced along the Moselle within 300 yards at Pagúy.

September 18—The Twenty-sixth Division made two raids during the night. One against St. Hilaire was without result, as the enemy had retired; the other against the Bois de Warville resulted in the capture of 15 prisoners.

September 19—The Ninety-second Division repulsed an attempted enemy raid in the St. Die sector.

September 20—The Ninety-second Division repulsed two enemy raids in the region of Lesseux.

September 26—The First Army attacked northwest of Verdun on a front of 20 miles and penetrated to an average depth of 7 miles.

September 27—The One hundred and seventh Regiment of the Twenty-seventh Division attacked east of Bellicourt and attained its objectives.

September 29—In the Argonne, the Americans met with furious resistance. Their losses were heavy, and they were unable to do more than hold their own.

September 30—The Twenty-seventh and the Thirtieth Divisions took prisoners north of St. Quentin totaling 210 officers and more than 1,200 men.

October 1—The twenty-eighth Division repulsed a hostile counterattack on the entire divisional front in the Aire Valley, with very heavy losses to the enemy.

October 3—The Second Division, operating with the fourth French Army, made an advance of 2 kilometers, reaching Medéah farm in the afternoon. In the evening the Second Division advanced about 3 kilometers, and their line ran from Medéah farm southwest along the road to Blanc Mont. They captured 1,000 prisoners, and casualties were estimated at 500.

October 4—The First Division attacked on both sides of Exermont, and made progress in spite of strong opposition from the enemy, who resisted with machine

guns in organized opposition. Approximately 300 prisoners were taken, and our casualties were 1,500.

October 5—The First Division captured Ariétal farm, and the line was advanced 400 yards beyond. The Sixth Division repulsed a large enemy raid on Sondernach.

October 7—A brigade of the Eighty-second Division advanced 7 kilometers, occupying Hill 223, north of Chatel Chéhéry; 46 prisoners were captured, including 1 officer. Our casualties were light. Later the enemy counterattacked and reoccupied Hill 223, north of Chatel Chéhéry.

October 8—The Fifty-ninth Brigade of the Thirtieth Division attacked, at 5 A. M., over a front of 5,000 yards, gained all first objectives by 9 A. M., and second objectives by noon. Fifty officers, 1,500 men, and four 101-millimeter guns were taken.

October 8–9—The second Corps advanced about 7 miles on a front of 4,000 yards and captured about 2,000 prisoners and 30 guns.

October 9—In spite of strong resistance the First Division advanced in the sector east of Fléville and captured 230 prisoners.

The Thirty-third Division, operating with the Seventeenth French Army Corps, attacked early in the morning north of Consenvoye and reached its final objective about 9 A. M. About 650 prisoners were taken.

October 10—The first Corps reached Cornay-La-Besogne Ridge and passed Malassise farm, east of Grand Ham.

The Sixtieth Brigade of the Thirtieth Division advanced 6 kilometers, reaching the Selle River, and held the St. Benin-St. Souplet-La Haie-Menneresse line. Up to the evening of the 9th, 50 officers, 1,800 men, and 32 guns were captured.

October 12—The Fourth Division repulsed two counterattacks by machine-gun fire, with severe loss to the enemy.

October 13—An attack on Grandpré this morning met very heavy machine-gun fire, and troops of the Second Corps were finally forced to retire south of the Aire. A hostile counterattack at 8 P. M. south of Landres-et-Georges was repulsed.

The Eighty-first Division repulsed an enemy raid in St. Die sector.

The Seventy-seventh Division took Grandpré.

October 17—The Twenty-ninth Division advanced to the summit of Bois de la Grand Montagne, east of the Meuse.

The Forty-second Division took Côte de Châtillon.

The Second Battalion of the Seventy-sixth Division reached the northern edge of Bois des Loges, west of Champigneulle.

In an attack on a 4,000-yard front from St. Souplet to Molain our troops advanced 3,000 yards against very stiff resistance. All counterattacks repulsed. Prisoners taken were estimated at 2,500.

October 19—The Thirtieth Division attacked with the British at dawn and advanced 2,000 yards. Prisoners captured since the morning of the 17th totaled 44 officers and over 1,500 men.

The Seventy-eighth Division pushed their lines forward to Bellejoyeuse farm and began to mop up the Bois des Loges.

October 21—In attacks on the Bois des Rappes the Fifth Division met with stubborn resistance by machine guns, supported by artillery and infantry fire. It captured the entire position with 170 prisoners, including 5 officers. An enemy counterattack, supported by heavy artillery fire, was repulsed with heavy losses.

The Fifth and Third Divisions took Hill 297 and Bois des Rappes.

Attacking in the evening, the Eighty-ninth Division occupied the northern and eastern edge of the Bois de Bantheville.

October 23—Troops of the Third Corps reached the ridge north of the village of Bantheville, taking 171 prisoners.

The twenty-ninth Division captured the ridge of Bois d'Etrayes and Hill 361.

October 27—The Seventy-eighth Division entered Bellejoyeuse farm, northeast of Grandpré, and found it occupied. The occupation of the right of way north and northwest of Grandpré was completed.

October 30—On October 30 patrols were active along the entire front of the Twenty-eighth Division. The Thirty-third Division, in the face of heavy artillery and machine-gun fire, north of Grandpré, advanced its lines and occupied the Bellejoyeuse farm. On October 30, 2,000 high explosive and gun shells fell in the vicinity of Fresnes. One of the divisional patrols captured five prisoners.

November 1—The troops of the First Army captured Clery-le-Grand. North of Ancreville they took 53 additional prisoners and continued their advance into the Bois des Bantheville. During the night of November 1–2 the troops of the Thirty-seventh Division consolidated their positions and effected a crossing of the River Scheldt, confronted by enemy machine-gun and rifle fire. The Ninety-first Division, supported by artillery and machine-gun fire, rapidly advanced over 6 kilometers in spite of enemy artillery and machine-gun fire. The enemy was driven from the west bank of the Scheldt and at noon the heights northwest of Audenarde were taken.

November 2—On the evening of November 2 the troops of the Seventy-eighth Division drove the enemy from the Bois des Loges and closely followed his retreat. The Ninety-second Division, in spite of machine-gun resistance, pushed forward and advanced the line 3 kilometers.

November 3—The Ninety-first Division, in spite of active machine-gun resistance, forced their way towards the bank of the Scheldt in the vicinity of Eyne.

November 4—On November 4 a brigade of the Seventy-ninth Division attacked an enemy sector, taking 81 prisoners and 8 machine guns, encountering strong resistance and repulsing several counterattacks.

November 5—On November 5 the troops of the Seventy-seventh Division engaged in severe fighting, overcame strong enemy resistance along the entire line. The artillery was active, firing on the enemy's retreating

columns. Harassing artillery fire was returned by the enemy. Aviation was active on both sides. The enemy flew over our front lines and delivered machine-gun fire on our advancing troops. Two enemy planes were brought down.

November 6—Our troops of the First Corps continued their successful advance, forcing the enemy to retire. The towns of Flabas, Raucourt, Haracourt, and Autrecourt were taken, and patrols pushed on as far as the Meuse. Large quantities of matériel were captured during the advance.

Following heavy bombardment on the enemy's divisions the troops of the Fifth Division attacked, rapidly overcoming the enemy's resistance, capturing Lion-devant-Dun, Murvaux, Fontaine, and Vilosnes-sur-Meuse, taking more than 250 prisoners.

November 7—The troops of the Second Division cleared the west bank of the Meuse of the remaining machine guns and snipers in the vicinity of Mouzon. The Fifth Division, supported by artillery fire, continued their advance despite the enemy's continued resistance, principally with machine guns. Most of the artillery crossed to the east bank of the Meuse, following in support of the Infantry. Additional prisoners were taken, including 2 officers and 132 men.

November 8—The patrols of the Second Division crossed the Meuse south of Mouzon. The troops of the Thirty-third Division, aided by barrage fire, carried out a successful raid on Château Aulnois, capturing 1 officer and 22 men. Strong combat patrols were sent out from the lines of the Ninety-second Division

(colored). Prisoners were captured and casualties inflicted on the enemy.

November 9—On midnight of November 9 the patrols of the Fifth Division drove back the enemy, inflicting many casualties and capturing 6 prisoners. The troops consolidated and, despite stubborn resistance, principally from machine guns, drove the enemy from Bois du Canol and La Sentinelle and captured Brandeville. In these operations 47 prisoners, 125 machine guns, and other matérial were captured. A strong combat patrol was active along the entire front of the Thirty-third Division, meeting with heavy machine-gun resistance from the enemy, and a patrol of one company captured 8 prisoners in the Bois de Warville. The troops of the Seventy-ninth Division advanced in a generally northeasterly direction, with the right flank in Bois de Damvillers. The Forty-second and units of the First seized the heights south of Sedan.

November 10—The Thirty-third Division carried out a successful raid on Marcheville, occupying the town and taking 80 prisoners, including 3 officers. Strong patrols from the line engaged in sharp fighting. The Thirty-seventh Division, operating with the Thirty-fourth French Army Corps, attacked in order to force a crossing of the Scheldt. Violent enfilading machine-gun fire, heavy artillery, and the flooded condition of the terrain delayed the construction of bridges and crossings. In the face of continuous heavy artillery fire, supported by machine guns, the troops advanced about 2 kilometers. The Ninetieth Division advanced toward Baâlon, encountering no resistance. The

Ninety-second Division reached Bois Frehaut and captured 710 prisoners.

November 11—The Third Division advanced 3 kilometers east of Bréhéville. Despite increased resistance by machine-gun and artillery fire, the Fifth Division continued to advance, capturing 18 prisoners, 3 large-caliber guns, 6 minenwerfers, and considerable matérial. In accordance with the terms of the armistice, hostilities on the front of the American armies ceased at 11 A. M.

SUMMARIZED CHRONOLOGY OF THE WAR

1914

June

28.—Assassination of Archduke Francis Ferdinand, heir to throne of Austria-Hungary, and his wife at Sarajevo, Bosnia.

July

28.—Austria-Hungary declares war on Serbia.
29.—Russian mobilization ordered.

August

1.—Germany declares war on Russia.
1.—France orders mobilization.
2.—Germany demands free passage through Belgium.
3.—Germany declares war on France.
3.—Belgium rejects Germany's demand.
4.—Germany at war with Belgium. Troops under Gen. Von Kluck cross border. Halted at Liége.
4.—Great Britain at war with Germany. Kitchener becomes Secretary of War.
5.—President Wilson tenders good offices of United States in interests of peace.
6.—Austria-Hungary at war with Russia.
7.—French forces invade Alsace. Gen. Joffre in supreme command of French army.
7.—Montenegro at war with Austria.
7.—Great Britain's Expeditionary Force lands at Ostend, Calais and Dunkirk.
8.—British seize German Togoland.
8.—Serbia at war with Germany.
8.—Portugal announces readiness to stand by alliance with England.
11.—German cruisers *Goeben* and *Breslau* enter Dardanelles and are purchased by Turkey.
12.—Great Britain at war with Austria-Hungary.

12.—Montenegro at war with Germany.
17.—Belgian capital removed from Brussels to Antwerp.
19.—Canadian Parliament authorizes raising expeditionary force.
20.—Germans occupy Brussels.
23.—Japan at war with Germany. Begins attack on Tsingtau.
24.—Germans enter France near Lille.
25.—Austria at war with Japan.
26.—Louvain sacked and burned by Germans. Viviani becomes premier of France.
28.—British fleet sinks three German cruisers and two destroyers off Helgoland.
28.—Austria declares war on Belgium.
29.—Russians invest Konigsberg, East Prussia. New Zealanders seize German Samoa.
30.—Amiens occupied by Germans.
31.—Russian army of invasion in East Prussia defeated at Tannenberg by Germans under Von Hindenburg.
31.—St. Petersburg changed to Petrograd by imperial decree.

September

3.—Paris placed in state of siege; government transferred to Bordeaux.
3.—Lemberg, Galicia, occupied by Russians.
4.—Germans occupy Rheims.
6–10.—Battle of Marne. Von Kluck is beaten by Gen. Joffre, and the German army retreats from Paris to the Soissons-Rheims line.
10.—*Emden,* German cruiser, carries out raids in Bay of Bengal.
14.—French reoccupy Amiens and Rheims.
19.—British forces begin operations in Southwest Africa.
20.—Rheims cathedral shelled by Germans.
24.—Allies occupy Peronne.
25.—Australians seize German New Guinea.
28.—Anglo-French forces invade German colony of Kamerun.
29.—Antwerp bombardment begins.

October

2.—British Admiralty announces intention to mine North Sea areas.
6.—Japan seizes Marshall Islands in Pacific.
9.—Antwerp surrenders to Germans. Government removed to Ostend.
13.—British occupy Ypres.

14.—Canadian Expeditionary Force of 32,000 men lands at Plymouth.

15.—Germans occupy Ostend. Belgian government removed to Havre, France.

NOVEMBER

1.—*Monmouth* and *Good Hope*, British cruisers, are sunk by German squadron off Chile under command of Admiral von Spee.

5.—Great Britain and France declare war on Turkey.

5.—Cyprus annexed by Great Britain.

7.—German garrison of Tsingtau surrenders to Japanese.

9.—*Emden*, German cruiser, which had carried out raiding operations for two months, is destroyed by Australian cruiser *Sydney* off the Cocos Islands, southwest of Java.

16.—Prohibition of sale of intoxicants in Russia enforced.

27.—Czernowitz, capital of Bukowina, captured by Russians.

DECEMBER

2.—Belgrade occupied by Austrians.

3.—Cracow bombarded by Russians.

8.—Off the Falkland Isles, British squadron under command of Rear-Admiral Sturdee, sinks three of the German cruisers which had destroyed the *Good Hope* and *Monmouth* on Nov. 1. The *Dresden* escapes.

14.—Austrians evacuate Belgrade.

16.—German squadron bombards Hartlepool, Scarborough and Whitby on east coast of England.

23.—Siege of Cracow raised. Russians retire.

1915

JANUARY

24.—British fleet puts to flight a German squadron in North Sea and sinks the battle cruiser *Blücher*.

28.—American bark, *William P. Frye*, sunk by German cruiser in South Atlantic.

FEBRUARY

10.—Russians defeated by Germans in Battle of Masurian Lakes.

18.—German submarine "blockade" of British Isles begins.

25.—Allied fleet destroys outer forts of Dardanelles.

MARCH

2.—Allied troops land at Kum-Kale, on Asiatic side of Dardanelles.

10.—British take Neuve Chapelle in Flanders battle.
14.—*Dresden*, German raiding cruiser, is sunk by British squadron off the Chilean coast.
22.—Austrian fortress of Przemysl surrenders to Russians.

APRIL

22.—Poison gas first used by Germans in attack on Canadians at Ypres, Belgium.

MAY

1.—American steamer *Gulflight* torpedoed off Scilly Isles by German submarine; 3 lives lost.
2.—British South Africa troops under General Botha capture Otymbingue, German Southwest Africa.
7.—Germans capture Libau, Russian Baltic port.
7.—*Lusitania*, Cunard liner, sunk by German submarine off Kinsale Head, Irish coast, with loss of 1152 lives; 102 Americans.
23.—Italy declares war on Austria-Hungary and begins invasion on a 60-mile front.
24.—American steamer *Nebraskan* torpedoed by German submarine off Irish coast, but reaches Liverpool in safety.
31.—German Zeppelins bombard suburbs of London.

JUNE

1.—Germany apologizes for attack on *Gulflight* and offers reparation.
3.—Austrians recapture Przemysl.
3.—British forces operating on Tigris capture Kut-el-Amara.
4–6.—German aircraft bombs English towns.
7.—Bryan, U. S. Secretary of State, resigns.
15.—Allied aircraft bombs Karlsruhe, Baden, in retaliation.
22.—Lemberg recaptured by Austrians.
26.—Montenegrins enter Scutari, Albania.

JULY

9.—German Southwest Africa surrenders to British South African troops under Gen. Botha.
25.—American steamer *Leelanaw*, Archangel to Belfast with flax, torpedoed off Scotland.
31.—Baden bombarded by French aircraft.

AUGUST

5.—Warsaw captured by Germans.
6.—Ivangorod occupied by Austrians.

6.—Gallipoli Peninsula campaign enters a second stage with the debarkation of a new force of British troops in Suvla Bay, on the west of the peninsula.

8.—Russians defeat German fleet of 9 battleships and 12 cruisers at entrance of Gulf of Riga.

19.—*Arabic*, White Star liner, sunk by submarine off Fastnet; 44 lives lost; 2 Americans.

25.—Brest-Litovsk, Russian fortress, captured by Austro-Germans.

28.—Italians reach Sima Cista, northeast of Trent.

30.—British submarine attacks Constantinople and damages the Galata Bridge.

31.—Lutsk, Russian fortress, captured by Austrians.

SEPTEMBER

2.—Grodno, Russian fortress, occupied by Germans.

6.—Czar Nicholas of Russia assumes command of Russian armies. Grand Duke Nicholas is transferred to the Caucasus.

15.—Pinsk occupied by Germans.

18.—Vilna evacuated by Russia.

24.—Lutsk recaptured by Russians.

25.—Allies open offensive on western front and occupy Lens.

27.—Lutsk again falls to Germans.

OCTOBER

5.—Greece becomes political storm center. Franco-British force lands at Salonika and Greek ministry resigns.

9.—Belgrade again occupied by Austro-Germans.

11.—Zaimis, new Greek premier, announces policy of armed neutrality.

12.—Edith Cavell, English nurse, shot by Germans for aiding British prisoners to escape from Belgium.

13.—London bombarded by Zeppelins; 55 persons killed; 114 injured.

14.—Bulgaria at war with Serbia.

14.—Italians capture Pregasina, on the Trentino frontier.

15.—Great Britain declares war on Bulgaria.

17.—France at war with Bulgaria.

18.—Bulgarians cut the Nish-Salonika railroad at Vranja.

19.—Italy and Russia at war with Bulgaria.

22.—Uskub occupied by Bulgarians.

28.—Pirot captured by Bulgarians.

29.—Briand becomes premier of France, succeeding Viviani.

NOVEMBER

5.—Nish, Serbian war capital, captured by Bulgarians.

9.—*Ancona*, Italian liner, torpedoed in Mediterranean.

17.—Anglo-French war council holds first meeting in Paris.
20.—Novibazar occupied by German troops.
22.—Ctesiphon, near Bagdad, captured by British forces in Asia Minor.
23.—Italians drive Austrians from positions on Carso Plateau.
24.—Serbian government transferred to Scutari, Albania.

DECEMBER

1.—British Mesopotamian forces retire to Kut-el-Amara.
2.—Monastir evacuated by Serbians.
4.—Henry Ford, with large party of peace advocates, sails for Europe on chartered steamer *Oscar II,* with the object of ending the war.
13.—Serbia in hands of enemy, Allied forces abandoning last positions and retiring across Greek frontier.
15.—Gen. Sir Douglas Haig succeeds Field Marshall Sir John French as Commander-in-Chief of British forces in France.
20.—Dardanelles expedition ends; British troops begin withdrawal from positions on Suvla Bay, and Gallipoli Peninsula.
22.—Henry Ford leaves his peace party at Christiania and returns to the United States.

1916

JANUARY

11.—Greek island of Corfu occupied by French.
13.—Cettinje, capital of Montenegro, occupied by Austrians.
23.—Scutari, Albania, taken by Austrians.
29–31.—German Zeppelins bomb Paris and towns in England.

FEBRUARY

1.—*Appam,* British liner, is brought into Norfolk, Va., by German prize crew.
10.—British conscription law goes into effect.
